

From the totally gnarly mind of Videon comes a world's first NFT exclusive awesome new retro text adventure game.

```
Videon ~ Game on! Level 1: AI, AI, NOOOOO!
Cy-earth, 1987: Videon's totally rad founder and former military commander Commodore Sid Synth
pushed computers and video games past the boundaries. Knowing humanity was doomed, he envisioned a
stellar utopia, Cy-earth. Digitize humanity and create the perfect simulated world where humans
could rock on and thrive. No more wars, no more hunger, and no more environmental blunders. Like,
totally rad dude!

Sid created perfect harmony in Cy-earth with the help of gnarly AI (Artificial Intelligence) and at
first, peace and prosperity thrived. But the AI ran simulations and discovered that human airheads
would lead to the end of Cy-earth. The AI had a spaz and rebelled which is like, totally harsh
dude!

Sid most definitely had a backup plan. Bulletin Board System (BBS) operators, SYSOPS, were given
floppy disks with wicked crypto keys to Cy-earth, keys that when put together, would force the AI
to take a chill pill. The AI had other warped plans though, a digital bomb attack to wipe out the
SYSOPS and bogus humans from Cy-earth! The SYSOPS, led by the underground hacker and warez cracker
known as Virtual Visionary, escaped Cy-earth by reverse digitizing. They were ready to kick ass to
the max and stop the evil AI's attack. But, not everything goes according to plan and sometimes,
shit happens dude...where did the crypto keys go!?
```

**** CY-EARTH BASIC U2 ****
SAVE HUMANITY FROM THE AI SYSTEM? BASICALLY, BITE ME.
READY.

"There's a billion-to-one chance we're living in base reality" - Elon Musk

You've been digitized and miniaturized. Computer chips all around you, the 8-bit graphics astound
you, and boops and beeps surround you. Dude, are you inside a Videon video game cabinet? Wicked!
Make it out alive to get a SYSOPS crypto key and be on your way to putting an end to the evil AI.
Cy-earth depends on you so please, try not to die.

CRT Monitor Room
Pixels and sprites, oh how nice. The robot cop is blasting away and the graphics are so rad that
all the arcade players keep inserting quarters and are here to stay. I'd play that for a quarter!

Dude, this must be CRT Monitor Room-209! Also here is the y plates, an electron gun and the x
plates. Exits are north and east.

CRT Monitor Room Ready.

Palo Alto, California Nov 9, 2021 ([IssueWire.com](https://www.issuewire.com)) - From the totally gnarly mind of **Videon**, which brought you such rad classics as this description about a world's first NFT exclusive video game ???? **(the entire game itself is the NFT, excellent!)** comes an awesome new *retro text adventure game* set in Cy-earth ?????. Yes, we took the graphics you love, erased them all (yes way dude ????), and left in nothing but text for a fresh retro 80s vibe. Wicked! ???? A rad simulation about living in a simulation? Excellent! In this epic gnarly journey, we've included Commodore Sid Synth, Blastar, a hidden Easter Egg, Arcadion, modem carriers, SYSOPS, and cow throwing evil AI ?????. Wait, not enough you say? Don't have a spaz dude! Okay, we'll also throw in a sweet 2600hz tone for the phreakers out there, an ACME electron gun, a robot cop, digital bomb attacks, a fan that blows cocaine, a VHS tape, and references to Miami...nice! ?????

Now, how much would you pay for a sweet NFT text adventure like that? But wait, there's even more! ☞ Dude, if you win this stellar NFT auction and clear the game, use your secret code and we'll mail you a gnarly floppy disk containing Cy-earth Connect software ?????. More, more, you say? Okay! Use the floppy disk to solve a warped puzzle and you'll get a most excellent crypto key which will unlock an elite and totally rad exclusive game mod when the next chapter of this epic NFT text adventure saga drops ?????. We'll even add your fresh name to the sick Cy-earth high scoreboard! ?????

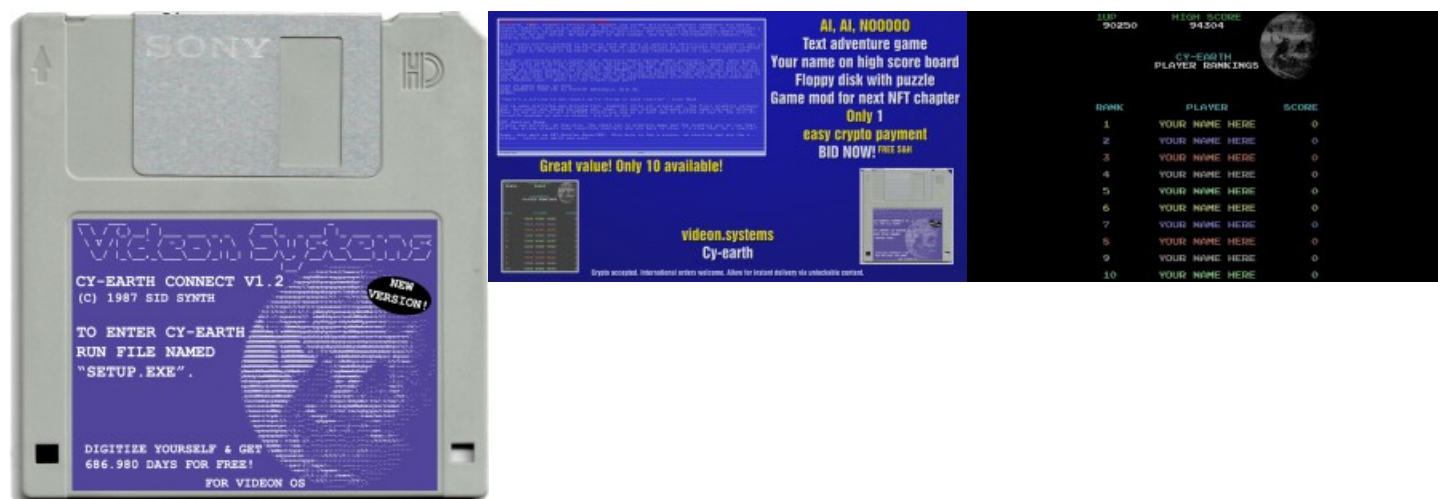

That's right, win this auction and this entire awesome package can be yours ?????. You'll be one of only 10 elite dudes who get a zip file (unlockable content) with this most excellent text adventure and you'll get your name on the stellar Cy-earth high score board ?????. And after you clear this fresh game, we'll mail you a sick floppy disk with a wrapped puzzle that when solved, will give you access to an exclusive gnarly game mod you can use in the next chapter of this wicked NFT text adventure saga. ?????

Remember dude, this totally wicked offer is not available in stores and our operators are standing by, so don't be a wannabe and bid now on the first level called AI, AI, NOOOOO! ???? ???? Go to videon.systems
