

# Invoicera launches its new workforce management tool- Workstatus

**Gurgaon, Haryana Nov 26, 2021** ([IssueWire.com](https://www.issuewire.com)) - [Invoicera](https://www.invoicera.com), an invoicing software company, has recently launched a new workforce management tool called '[Workstatus](https://www.invoicera.com/workstatus).' This will allow employers to see their employees on one dashboard, manage schedules, track time-off requests efficiently, and evaluate productivity.

Workstatus provides support for all types of businesses- from retail stores to restaurants or healthcare professionals-allowing employees to get the resources they need when they need them.

The company's AVP, Vivek Awasthi, is confident that this product will help improve operational efficiency for businesses by giving them more control over labor costs. "It would be like having all of your employees on one spreadsheet," he said in an interview about the product.

**Moreover, companies can avail following benefits by integrating the recently launched workforce management tool.**

## 1. Streamlined Workforce Experience

The workplace should be a place where workers feel empowered and supported. It's great to have an environment that encourages communication, collaboration, feedback loops - it makes them want to stay at your company.

The new workforce management tool provides a powerful employee experience that strengthens workplace bonds by providing communication and collaboration channels, quick access to information with in-the-moment feedback.

## 2. Accurate Workforce Scheduling

The software offers a flexible, collaborative approach to scheduling that ensures the needs of businesses and internal policies are met. With the new tool, employers can rest easy knowing qualified employees will be placed when they need them most while empowered workers get to communicate to resolve last-minute conflicts.

## 3. Workforce Labor Forecasting

This new employee scheduling app harnesses the power of machine learning to improve forecast models by evaluating current and historical data. The goal? To more accurately predict labor needs, ensuring optimal staffing levels for any given situation or employer's preferences in a time frame that works best with their schedule.

**Workstatus exclusive features that set it apart from other workforce management tools include:**

- It offers a real-time look into what needs to be done for each shift.
- It provides you with the ability to integrate with no software and promptly start using the system.
- Automatic paychecks, as well as accurate hours, worked reporting (with customizable time

zones).

- It gives you data on every employee, allowing managers to understand better how resources are being used and who is providing positive customer service.

"With this exclusive workforce management tool, employers can deliver a compelling value proposition to their employees that will help the organization to touch new heights in its respective field.," said Vivek Awasthi.

## About Workstatus

Workstatus is an efficient and effective [workforce management system](#) that provides for the requirement of hours, breaks, and other fundamental elements related to the scheduling of employees. Workstatus has a simple interface that both admin and non-admin user accounts can use. The program also comes with the ability to generate reports in excel format, which is handy for monitoring purposes.

Workstatus is the only work scheduling software on the market today that goes beyond basic timecard generation and provides advanced functionality for workforce management.
