

King Forever launches a new meme crypto token that is gradually gaining popularity

New York, United States Nov 10, 2021 ([Issuewire.com](https://www.issuewire.com)) - King Forever is a meme coin that's been gaining some serious popularity as of late.

It's an extreme growth spurt that's led to some people taking the coin seriously. Even some cryptocurrency experts are starting to take notice... "Here's an example of a crypto token that is amusing, adorable, and growing in the ranks." Says Bereri, a well-known crypto analyst. "There seems to be a lot of 'fear of missing out' in the social media groups, and this crypto token is a perfect example of that."

But does this coin have staying power? Or is it just a quick pump-and-dump scheme? Here's what you need to know...

What Is King Forever?

It is the largest adventure role-playing game ever to be built on the Binance Smart Chain. King Forever is a community-based and community-focused token on the Binance Smart Chain. It was created by members of the Dogecoin & Shiba community. According to its whitepaper, the coin is supposed to be a fun cryptocurrency that's mostly used for tipping and gifting but the team may be planning to release more use cases in the future. The cryptocurrency has been gaining massive popularity on social media.

King Forever Tokenomics

King Forever has a total supply of 100,000,000,000,000,000 (100 quadrillions)
3% of every transaction gets redistributed between all holders proportionally to held tokens.
4% of every transaction is added to liquidity. King Forever is a community-based token, which means the development of the project is done by its community members. The community members are paid in tokens by the platform for their contributions. The tokenomics utility model is to be used for paying for

goods and services. It is also intended to be used as a reward to the users of the platform. This is done by a token-burning function.

2% Buyback Fee.

King Forever Goals

The developers also want to create a community-based cryptocurrency that is community-driven. According to King Forever whitepaper, the focus will be on getting the coin out there and giving back to the community as soon as they are able to. This will be done through giveaways, Merch drops, contests, events, conventions, and more. The developers are also hoping to grow the project by creating and managing a network of communities. The network will consist of crypto enthusiasts in all parts of the world. "The project is supported by leaders of the community that have a history of honesty and integrity in their dealings with the community." says a Baby Wolf community member. The community can help the project by contributing time and resources to create & maintain this network.

As for utility, the cryptocurrency is intended to be used for tipping, gifting, and paying friends, family, and users on social media, but the team may be planning to add more use cases in the future such as liquidity yield farming, a custom marketplace that pays you out in King Forever, and a coin swap.

How to Buy KING FOREVER?

There are hundreds of exchanges such as Binance and Coinbase around the world that give you the ability to buy and sell thousands of cryptocurrencies. However, none of the top cryptocurrency exchanges sell King Forever yet. This is because the coin is still very young and isn't widely traded. As the coin becomes more popular, you can expect to see more exchanges offering it. The current way to purchase King Forever is through PancakeSwap and you'll need a wallet such as MetaMask or TrustWallet to store your coins.
