**Noida, Uttar Pradesh Nov 18, 2021 ([IssueWire.com](http://IssueWire.com))** - Dr. Rajesh Singh BAMMS and 51 years of practicing experience, announced the launch of 360 -degree web portal focusing on Ayurveda. While talking to the media DR. Singh, who has been practicing for 51 years now said that Ayurveda can treat most of the Ailments provided people reach the right Ayurveda doctor at right time. Dr. Singh also revealed that there are highly skillful and experienced Ayurvedic doctors available in every part of the country but unfortunately there is no one platform to connect people to these doctors. Understanding the need, we have launched the portal [www.sushainclinic.com](http://www.sushainclinic.com) that encompasses the best of the Ayurvedic doctors across the country and highly authentic medicines and lifestyle products.

Dr. Rajesh said that most people do not know that there are MDs and PhDs in Ayurveda? That there are highly qualified and experienced doctors who are specialists in different streams of Ayurveda? Do you know that Ayurveda is not only effective against common illnesses but also against Chronic and Terminal diseases? I met Dr. Rajesh Singh who is practicing Ayurveda for more than 40 years. He states “Ayurveda can not only treat chronic diseases like Arthritis, Migraine, Diabetes, Fatty Liver & Piles but also can bring magical results in so-called terminal illnesses like Cancer, Hepatitis and Liver Cirrhosis if a patient reaches to the right doctor.”

Here lies the strength of Ayurveda. There is no dearth of good Ayurveda practitioners nor are there any shortages of effective Ayurveda medicines. The reality is that we have never taken it seriously. We consume Ayurvedic products with **Over Counter (OTC)** purchases or get influenced by the **Over the Mic (OTM) announcements**. Ayurveda is scientific, serious, and miraculous but our casual approach to it has reduced it to the space of ‘**Home Remedies**’ instead of being in the ‘**Expert Domain**’. This has made this science vague and the real benefits do not reach the people in need. Needless to say, this is a great disservice to thousands of years of knowledge and heritage of our country.

[WWW.SUSHAINCLINIC.COM](http://WWW.SUSHAINCLINIC.COM) is a platform-built 360-degree Ayurvedic solution for healthcare needs. The vision of SUSHAIN resonated with a large no. of qualified and experienced practitioners of Ayurveda who graciously agreed to come on board in an endeavor to promote ‘**Goodness of Life**’.
