

## Miracle Research Invested More \$120 Mililion In Defi Ecology System

In early October, the Miracle Research announced that they added \$120 million to their investment portfolio in Defi ecology system – a promised land for the professional investors.

**New York, United States Nov 19, 2021 ([Issuewire.com](https://www.issuewire.com))** - In early October, Miracle Research Capital announced that they added \$120 million to their investment portfolio in the Defi ecology system – a promised land for professional investors.

According to Defipulse.com, the total locked value in DeFi transactions was \$500 million in the last year. At the moment, the indicators in DeFi transaction is nearly up to \$10.95 billion, which means that it increased incredibly 1.900% in just 12 months compared to Ethereum competitors such as Binance Smart Chain, Solana, and Avalanche. Thanks to this data, we can hope that Defi will become a bright new star in the crypto world.

“The biggest advantage of Miracle Research is the thorough selection process and the enthusiastic support from the project team. In addition, Miracle Research always give valuable advice in a marketing campaign and accompanies to start up to connect and open network in the Defi ecology system to the Crypto investment community and other famous funds in the world that creating a solid launching pad for the start-up to reach out to the global Crypto market,” shared the Director of Miracle Research

The rigorous evaluation project process includes 8 aspects implemented by Miracle Research to ensure objectivity and accuracy that include strong team, feasibility, economic model (tokenomics), technology platform, organizational and legal form, digital asset management process, finance and accounting,

marketing, and sales capabilities.

The fact that the Startup passes the appraisal round and receives “a nod” from Miracle Research will be a reliable guarantee of the Startup's credibility, transparency, and commitment to implementing the project; that will be an important reference for investment decisions of other funds as well as the Crypto investment community.
