Chennai, Tamil Nadu Nov 25, 2021 (Issuewire.com) - [NEBOSH](#) new format open book exam though was seen with doubt and hesitation by the learners, now has created a huge demand. The new format open book exam has got a great reception and tremendous support from the learners. The new format [NEBOSH open book exam](#) has widened the way of thinking and understanding and provides a positive approach for the application of the mind.

This new format open book exam has the same value as the previous [NEBOSH international](#) general certificate closed book paper-based invigilated exams which were conducted at pre covid scenario. Some learners feel that the new format open book exam is easy and they can simply get through the exams. But it is not true. It requires careful reading and understanding of the syllabus and correct application of technical knowledge.

In the new format, open-book exam learners have some difficulty in understanding the scenario-based questions and some technical issues with uploading the answer template. But keeping the technical problem in mind NEBOSH has now decided to provide the login details well before the exams and also NEBOSH had released a youtube video tutorial to guide the learners. The word count of the answers given by the learners is also an important criteria. Since the duration of the exam is 24 hours, NEBOSH expects learners to provide detailed answers. The learners now have the freedom to refer to any source of information, but should not copy and paste. Keeping all the above-mentioned subject information and constraints we offer exclusive training and comprehensive revision and a range of mock tests.

We also offer individual care and assistance to students to ensure that they understand the concept of the NEBOSH international general certificate syllabus and the method of open book exam. We provide value-added handouts and tutor guidance notes to ensure easy understanding and we also support the students with audio notes.
