

Neridio Systems Announces the Launch of its AIOps powered Cyber Security Solution!

Bengaluru, Karnataka Nov 3, 2021 ([IssueWire.com](https://www.issuewire.com)) - Neridio Systems today unveils – **NervioGuard**.

Neridio announces the launch of its path-breaking, Cyber Resilience and Risk mitigation solution against Ransomware and insider attacks that all digital businesses are currently grappling with. We live in the world of Cyber-attacks, ransomware onslaught, data breaches, insider attacks, and various IT disasters. A holistic solution that radically improves data control, security, and risk mitigation is needed. Neridio responded to this market void with a revolutionary solution, code-named “**NervioGuard**”!

NervioGuard is a quantum leap in cyber resilience and as a Swiss-army-knife of IT Risk mitigation. It is built upon segmented data vaulting, AIOps, Information theory, Quantum-attacks safe data security at rest and in motion, autonomous data protection, and contextual system security paired with active response. NervioGuard is a next-generation solution from the NervioCloud product family, which won **NASSCOM EMERGE 50 awards** in 2019 and is backed by a number of market-defining **US patents** and trusted by several early customers.

*“Financial/Insurance institutions, defense, high-tech and healthcare organizations facing a daunting challenge - keeping their NAS Systems containing the backup storage infrastructure and critical data like EMR/PACS data stored in data servers or customer data stored in databases like MySQL or MongoDB under full visibility, security control and safe from intruders. Modern-day digital infrastructure needs a new approach to ransomware attacks. **NervioGuard** just delivered that on its market pioneering mission with its multi-vectored, ransomware Risk mitigation solution. Ransomware worms attacking corporations of all sizes. CSOs/CIOs are paralyzed by the threats of various natures that ravage their IT systems and question the very existence of their businesses. There isn’t a single solution that offers a holistic integrated approach on detection, mitigation, recovery, and avoidance”*

"After years of hard research and with an array of radical innovations in integrating Data protection and Cyber Security, Neridio is now ready to define the new ways of cyber resilience and IT Risk mitigation. As the market creator of cognitive IT resilience, we now simplify IT Resilience and radically improve cyber resilience" said **Peter Chacko, Promoter, Neridio Systems Pvt. Ltd.**
