Visakhapatnam, Andhra Pradesh Nov 16, 2021 ([Issuewire.com](https://www.issuewire.com)) - Oak Valley International School located in the smart city of Vizag, has added another feather to its cap by launching the first-ever Toddler Lab in the city.

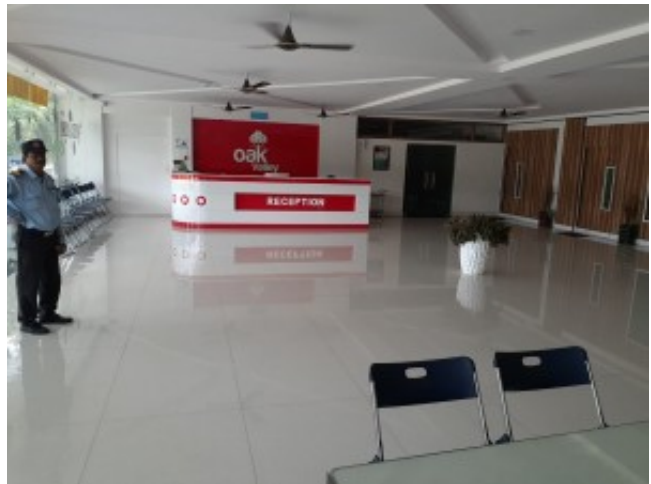

[Oak Valley International School](#) located in the smart city of Vizag, known for its state-of-the-art facilities and International Cambridge curriculum (IGCSE), has added another feather to its cap by launching the first-ever Toddler Lab in the city. The Toddler Lab is a concept and product of [HappyMongo](#) Online Solution- a leading Edutech company, specially created for early childhood education for students between 3 and 6 years. It includes educational tools such as Interactive Walls, Touch Screen Tables, Learning Mats and Nanobots, LEGO Education, Coding Express, Story Telling Sets, Magic Wall, and other multi-sensory activities to assist young students to grasp information, develop faster and embrace learning.

The various benefits of Oak Valley's Toddler Lab include motor and physical development, better communication and teamwork, easy academic learning, increased focus and problem-solving, higher creativity & innovation, and positive, self-confident, and enthusiastic students.

Annapureddy Balareddy, Chairman, and J. Aruna Reddy, Principal Oak Valley International School

stated “In our pursuit to offer our students the best education possible, HappyMongo’s Toddler Lab is a big step in the right direction. We have learned over the years that early education should be an immersive experience for students to be able to focus and grasp data in this age of information overload. Many parents complain that their children do not study and are easily distracted. Thanks to HappyMongo, we have discovered a viable solution to this problem, by including creative educational technology to enhance the daily curriculum and produce brilliant, well-rounded students”.

Mohan, COO, HappyMongo, and [Megha, COO, FutoLearn](#) commented, “The Toddler Lab is a physical, interactive and immersive space that is transforming how young students learn, play and develop. We set up the labs within the school premises for easy accessibility and application. All our products are well researched and suit specific age groups on their journey towards physical, social, and intellectual mastery. The long-term goal of HappyMongo’s Toddler Labs is to create a sound foundation for students to succeed in an automated, technology-driven 21st Century”.
