

Preparing for growth in Australia & New Zealand following Bloomberg

Belmont, Victoria Nov 14, 2021 ([Issuewire.com](https://www.issuewire.com)) - Oasis Investment Management Limited has been offering overseas investors strong solid advice. In recent months we have seen a dramatic rise from investors as Australian & New Zealand Investors look to source safe opportunities when performing International or Overseas Investments. In turn, we have seen a huge rise in personal recommendations from the same clients as we continue to deliver exceptional investment opportunities and feel it's time to grow in the area.

Oasis Investment Management Limited has recently added a number of new Account & Portfolio Managers to help and assist with the growing demand of clients in Australia and New Zealand with the long-term goal of expanding our operations into both Australia & New Zealand within the next 24 months.

We see this as a perfect starting plan as we prepare to branch into both Countries as when Oasis Investment Management Limited lays the foundations to enter Australia & New Zealand we do so with an experienced team of professionals who understand the market and what the market is is required.

We've partnered with some of the world's leading investment managers to invest in some of the best international companies for our investors. We accept that it's difficult, from our offices in Hong Kong, to research the entire universe of companies ourselves. That's why we've chosen managers that have truly global reach, with people on the ground in numerous countries who are best-placed to research local companies before they invest. What's more, they share our belief that taking a more active investment approach that will deliver the best outcomes for our investors over the long term.
