

Revolutionary Cryptocurrency “Out Of Pocket” Rewards Holders in Bitcoin and Will Become a Payment Option on WordPress

New York City, New York Nov 30, 2021 ([Issuewire.com](https://www.Issuewire.com)) - [Out Of Pocket](#) is the newest cryptocurrency in town that strives to bring transparency and integrity into the world of Defi. The token is designed to punish Paper-hands and reward Diamond-hands in Bitcoin. OOP Token was designed to be used by entrepreneurs with online businesses to accept as a form payment within the WordPress Platform.

Cryptocurrency's decentralized feature makes it the perfect currency for business transactions due to its security and speed features. People who use Out Of Pocket for transactions can ensure a seamless and convenient method to make payments for products and services. OOP was designed by a team of professional cryptocurrency investors who have faced a significant amount of negativity within the space, like honeypots, rug pulls, lazy developers, and inactive communities.

OOP allows investors to earn Bitcoin. There is a fee when an investor buys or sells. That fee is converted to Bitcoin and distributed among holders based on the percentage they're holding at the time. Investors can also sell their Bitcoin and invest it back in the coin to earn more. Apart from earning, the coin can also be implemented as a payment option on any WordPress website.

The team clearly understands what is necessary to restore faith in Defi—transparency, integrity, community, strategic marketing, dedication, consistent effort, and focus. The goal of Out Of Pocket is to restore the faith of investors by building trust with communication, transparency, and rewards.

A portion of fees will be utilized for marketing and emergency buy-back fund to guarantee consistent growth. With a stable flow of funds going into liquidity, investors will feel secure knowing funds are readily accessible if they're ready to sell without worries of draining the project.

PrettyKeli is the master behind this revolutionary cryptocurrency. She is a DOXXED developer with an excellent reputation as a successful crypto investor, influencer, and entrepreneur. PrettyKeli is also a YouTube influencer who grew her following organically using search engine optimization to more than 500,000 subscribers and over 25 million views.

According to a spokesperson from the Out Of Pocket Team, *"Our team is committed to the long-term success of this project. Our plan and vision will be implemented with focus and precision. We will treat investors' funds as though they were our own. We always welcome investors who would want to contribute to the development of our organization."*

OOP also plans to create the Out Of Poverty organization to assist the homeless in transitioning into a successful, healthy, and happy lifestyle through education and entrepreneurship.

About Out Of Pocket

Out Of Pocket is composed of a skilled and professional team of investors experienced in the DEFI space. The Out Of Pocket team is motivated to provide everything they expect from a project based on experience.
