

Sourceless Blockchain Board at Larnaca Conferences 2021 – The reality of tomorrow's AI & Robotics

Sourceless Blockchain Board will be present at Larnaca Conferences, where various topics on AI & Robotics will be discussed. Differentiating self-serving and illusive dreams from factual models and actual possibilities.

SATURDAY, NOV. 27, 2021 Sourceless Blockchain Board at Larnaca Conferences

THE REALITY OF TOMORROW'S AI & ROBOTICS

Larnaca Conferences, established in 2018, focus on THE prevailing topics of our age. They function as a social sculpture. The goal is not necessarily to find more answers, we have enough of that. What we need is active, intelligently directed interaction between people of different backgrounds, education, worldviews. What we need is human superintelligence.

Alexandru Stratulat
(Sourceless Blockchain Founder)

Blockchain Architect & DLT software engineer, founder of Sourceless Blockchain, Ccoin Network Fintech and Wisp Communication.

Iulian Bondari
(Sourceless Blockchain Co-Founder)

Entrepreneur and futurist, graphic and web designer, co-founder of Sourceless Blockchain, regional coordinator for The Venus Project and ambassador for International Organization of Human Rights.

LarnacaConferences **FORMWELTen-Institut** **formwelt weltform** **sourceless BLOCKCHAIN**

Dover, Delaware Nov 11, 2021 (Issuewire.com) - Sourceless Blockchain Board at Larnaca Conferences

Topic: The reality of tomorrow's AI & Robotics

Date: Saturday, Nov. 27, 2021

The 2 participants from Sourceless Blockchain are:

- **Alexandru Stratulat**, Blockchain Architect & DLT software engineer, founder of [Sourceless Blockchain](#), [Ccoin Network Fintech](#), and Wisp Communication.
- **Iulian Bondari**, entrepreneur and futurist, graphic and web designer, co-founder of Sourceless Blockchain, regional coordinator for [The Venus Project](#), and ambassador for the [International Organization of Human Rights](#) (IOHR Romania).

Keynote: **Bart de Witte**, [Hippo-Ai Foundation](#) Berlin, is a leading and renowned expert on digital transformation in healthcare in Europe, but also one of the most progressive thought leaders in his field.

Interviewer: **Gitta Peyn**, systems researcher and cyberneticist, co-developer of [FORMWELT](#) and [WELTFORM](#), founder of the [FORMWELTen Institute for Renewing Systems Research](#) and the [Larnaca](#)

[Conferences.](#)

Panel: Iulian Bondari, Gitta Peyn, Alexandru Stratulat, Bart de Witte

Moderators: Martin Geisenhainer (eLearning and social collaboration in agencies and software houses.), **Rebekka Manos** (expert in facilitating transformation and cultivating an atmosphere that nourishes growth and personal development).

Chat Moderator: Patrick Kappeler (organizational consultant and narrative architect on the DNA of companies and facilitates transformation and decision-making processes).

Online Forum Expert: Cadell Last (a general thinker interested in questions about human existence and evolution. He is the author of 'Global Brain Singularity' and 'Sex, Masculinity, God').

Session Facilitation: Daniel Dick (his scientific home is system science, social and cultural anthropology and consciousness research, his spiritual home is a pantheistic pragmatism with a focus on Vajrayana Buddhism and the aesthetics are part of enjoying beauty in nature, culture and between beings), **Robert Fuhrmann** (a pleasantly curious conversational partner who creates spaces for change through his questions, understanding complexity, in communication and the use of words, in structuring large quantities of information and he's empathetic towards people).

[Larnaca conferences](#), established in 2018, focus on THE prevailing topics of our age. They function as social sculptures. The goal is not necessarily to find more answers, we have enough of that. What we need is active, intelligently directed interaction between people of different backgrounds, education, worldviews. What we need is human superintelligence.

On each Saturday and Sunday afternoon throughout November, there will be a central theme in a panel on which people from around the world share ideas, raise new questions not previously considered, and form working groups to address them.

In the first hour of the panel, 4-5 experts will give a statement on the keynote, each from their own perspective.

After that the group's **Audience** and **Backstage** will separate as follows:

The audience continues the dialogue in the chat, accompanied by an online expert and a chat moderator. Backstage ticket holders can spend two one-hour facilitated breakout sessions at and with a panelist of choice, continuing discussion and networking. In both cases, the goal is to uncover blind spots and raise new questions. Essences from chat and breakouts will be posted on Carl Auer in the aftermath.

More details about the conferences: <https://www.formwelt.net/en/conferences>

Sourceless founder Alexandru Stratulat will talk about humanity's need for artificial intelligence and about the platform based on the new web. The platform is based on blockchain technology. It is reliable and protected from forgery of databases and we want to give some extra advantages to people by implementing GPT-3 Open AI and Formwelt into the platform.

Formwelt is a coding language for language and meaning. It is a linguistic system based on an injunction to acquire a definition. The kernel is semantically self-sufficient. It contains the basic concepts which are needed to describe any thinkable or perceivable phenomenon.

And, Generative Pre-trained Transformer 3 is an autoregressive language model that uses deep

learning to produce human-like text. It is the third-generation language prediction model in the GPT-n series created by OpenAI, a San Francisco-based artificial intelligence research laboratory.

Come and support one of the most ambitious projects since THE invention of printing!

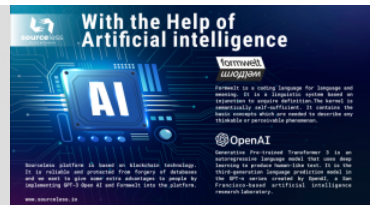

Alexandru Stratulat, Blockchain Architect & DLT software engineer, founder of Sourceless Blockchain, Coin Network Fintech and Wisp Communication.

Since 2014, at the first Romanian Ethereum Meetup (2014), one year before its launch, he started learning and designing the perfect ecosystem for community benefits, where new technology will be applied, and bring real solutions to some critical points like security, costs and all negative factors in networks and web. Starting 2016, Alex started designing and coding Sourceless Blockchain ecosystem and Coin Network financial ecosystem, an all-in-one blockchain solution, that can be applied to all domains of activity, bringing all the benefits of extreme security that blockchain and DLT systems provide. This year, 2021, Alex and SourceLess Team started integration and the designing of the software, that will contain all the benefits and newest technology, preparing it for BETA launch. Alex Stratulat, propose a unique type of software, which will help any user to maintain security at military grade, an unique certified identity inside the ecosystem, a new web remapping and different web protocols, including encrypted pip and blockchain-ownership for web domains, all powered by blockchain industry.

Iulian Bondari, entrepreneur and futurist, graphic and web designer, co-founder of Sourceless Blockchain, regional coordinator for The Venus Project and ambassador for International Organization of Human Rights (IOHR Romania)

With over 12 years of experience in advertising production, vector graphics and web design, Iulian first interaction with the world of volunteering was in high school. He played guitar for an association of people with disabilities. The event, as far as he can remember, was called "Be a Santa Claus too". And since then, he gathered over 15 years of volunteering for various organizations. At the moment he is a volunteer for the International Organization of Human Rights Romania, where he has been active for over 12 years, and recently, at most 2 years ago, he got in touch with the wonderful family of The Venus Project. He is the co-founder of Sourceless Blockchain, and together with Alexandru Stratulat (Sourceless founder) and the entire team, they will create a new web based on blockchain and DLT technology.
