# Staking Focused Crypto Token ORFIN announced by Orfinex International

### Orfinex International Group has announced a Native Cryptocurrency Staking Token ORFIN

**Dubai, United Arab Emirates Nov 21, 2021 (Issuewire.com)** - Global Investment Firm Orfinex International is currently developing its native token – ORFIN - which will be launched for current and new Orfinex users out of an exclusive Staking Plan on the Orfinex Dashboard. The availability of the ORFIN (OFN) token to the community will go a long way in increasing the efforts of staking & investment issues. The OFN token which will be accessible to the public from January 1st, 2022 is focused on helping investors' finance.

Orfinex says the ORFIN (OFN) token will improve the quality of services delivered to existing customers, reduce transaction fees, and guarantee safe and swift transactions for the revenue generated for clients. While the ORFINEX is still in the expansion phase, Orfinex has supplied an amazing chance for old and new Orfinex users in India, Pakistan, Malaysia, United Arab Emirates, China, Vietnam, Turkey, Spain to OFN via an exclusive staking program.

**What is ORFIN?**

ORFIN is a short name of Orfinex with OFN as a Symbol. It is the token of the Orfinex Group, an international firm to enable quick transactions at a decreased fee, a fast distributed exchange with effective escrow and profits sharing in place. The launch of the ORFIN token was announced on Nov 19th, 2021.

The liquidity of the ORFIN will be founded purely by the growing investor demand for cryptocurrencies, Decentralized Finance (DeFi), and the rising enthusiasm for Environmental, Social and Corporate Ascendancy impact financing focusing on Staking Model. The ORFIN, like any other, will be contingent on its utility, and of course supply and demand, to establish its exchange rate. ORFIN is also the token that has the formal assistance of many nations. After that, orfinex.com will work closely with the community in order to build other blockchain products. The ORFIN Token is designed to be scalable, therefore, new products will be built on it, consequently increasing the value of ORFIN.

**How to own ORFIN?**

Because Orfinex holds its investors and traders in high esteem while also reducing risk, Orfinex International will not hold any ICO for ORFIN (OFN). It is different from other ICO's / IPO's where investors will have to pay ETH or BTC to secure a specific amount of the coin at an earlier stage or pre-sale. Instead, ORFIN will be providing an equivalent option to both new and old Orfinex users in India, Pakistan, Malaysia, United Arab Emirates, China, Vietnam, Turkey, Spain, and other countries through staking.

For now, Orfinex only allows buying ORFIN tokens through the Orfinex Dashboard. So you need to open Orfinex Web App and begin buying ORFIN at the tap of a button from January 1st, 2022.

For additional information go to, orfinex.com. OFN token will be available on January 1st, 2022 on the highly respected, Award-Winning Pancake Swap Exchange (https://pancakeswap.finance) for both individual and institutional investors. This Exchange is Decentralized Exchange (DEX). It is recognized for its dependability and accessibility for traders of all experience levels. Pancake Swap Exchange offers improved security protocols for the protection of each transaction. It includes the world's first online store for buying goods with cryptocurrency.
