How can an Online Food Ordering Website actually help Restaurants?

Online food delivery is increasing at an expedited speed & on the contrary, due to Covid-19 Pandemic, the worldwide decrease (Year over Year) of dine-in customers in 2020 was 25.59%, compared to 2019. It was indeed a significant drop. The percentage had fallen to 81.74% in 2021, but Online food delivery increased globally by 67%. The U.S.A. is leading with a 123% increase (according to Statista - June 2, 2020).
