They are confident patients will feel welcome and cared for in their office. They are proud to be a small enough practice to develop a personal relationship with each patient, while giving them access to world-class resources and facilities.

Becoming a doctor because of his fascination with human biology, Dr. Kopczynski put that love of biology to work after a professional baseball career with the Texas Rangers. The mission of the ABOG is to define specialty standards, certify obstetricians and gynecologists, and facilitate continuous learning to advance knowledge, practice, and professionalism in women's health.

Obstetrics and gynecology (OB-GYN) is the medical specialty that encompasses the two subspecialties of obstetrics (covering pregnancy, childbirth, and the postpartum period) and gynecology (covering the health of the female reproductive system – vagina, uterus, ovaries, and breasts).
