**Tampa, Florida Nov 12, 2021** ([Issuewire.com](https://www.issuewire.com)) - CRYPTOCURRENCY: Brady Bucks (\$BB) is leading the new wave of Cryptocurrencies. Inspired by the NFL great himself, Tom Brady, it is the 1st sports fan-based Yield Generation token. It combines the best of sports fans with the new standard of DeFi Tokenomics with its innovative Token distribution strategy, designed to let long-term holders feel like they've won the Superbowl.

Every Buy/Sell transaction in Brady Bucks is taxed and is used to fund advanced mechanisms like automatic and Manual Buyback and adding liquidity in decentralized exchanges to drive long-term growth.

This combined with an experienced team of developers and a rapidly growing community, set up Brady

Bucks and its token holders for long-term success and income.

Starting with the launch of the Brady Bucks token this week, the team is aware of the importance of real-world use not just passive income and intends to create a variety of products and use-cases within the Brady Bucks ecosystem to enhance the value of the \$BB token. These products include the Brady Bucks Betting Platform, NFT's, and an NFT marketplace.

**Brady Bucks Unique Features:**

**8% Redistribution in \$BUSD:** 8% of every buy and sell transaction is automatically redistributed to all token holders. There is no need for holders to claim their rewards as the \$BUSD is delivered automatically to their wallets by holding the Brady Bucks token. It effectively means that apart from a return from an increase in Token prices, Users get to earn Stable Passive income in BUSD.

**3% Strategic Buy-Back Reserve:** The tokens collected from fees are stored securely in the Brady Bucks contract. The contract is coded so that the Strategic Reserves cannot be withdrawn and can only be utilized to buy back Brady Bucks coins from the open market and burn them. Additionally, every time Tom Brady throws a touchdown Brady Bucks will burn ten billion tokens.

**2% Automatic Liquidity:** 2% of every transaction is sent to PancakeSwap for Liquidity. Pancakeswap is a BSC-based decentralized exchange that fixes the low liquidity problems of DEXs through the liquidity Pool concept. A liquidity pool always contains a pair of tokens, which you can trade. The project's Smart contract deposits 3% from every buy/sell transaction as \$BB and \$BNB into a liquidity pool.

**1% Marketing:** 1% from every transaction is allocated to Marketing to fuel the most ambitious projects from our ecosystem and reward the active community. Marketing will not only be digital but will include real-world events around Tom Brady games and key milestones.

The Brady Bucks' team will also help other fan groups launch their own Crypto Token, through their Crypto Token Launch service. This service also serves to burn more BB coins as all revenue from the Crypto Token launches will be burned

Brady Bucks was founded by a group of Tom Brady fans, avid investors and built upon a set of core principles and values which focus upon the value associated with a collective group of like-minded individuals and the innovation and drive that arises from this form of collaboration.

Cryptocurrencies are steadily gaining mainstream acceptance. Recently Cryptocurrency ETFs have launched on the New York Stock Exchange and ASX and more people are realizing the true potential of Crypto Currencies. It is this strong growth in the sector that will continue to take Brady Bucks and its growing community to the Super Bowl and beyond.

Tom Brady is the GOAT of NFL quarterbacks. He has accounted for over six hundred touchdowns and won seven super bowls in his career and whilst he has inspired the launch of Brady Bucks he is in no way affiliated with or endorses Brady Bucks.
