

Utopia Metaverse - Ambassador program and \$50000 airdrop are open now!

A metaverse project that transforms everything into blockchain

Avondale, Arizona Nov 17, 2021 ([Issuewire.com](https://www.issuewire.com)) - **Ambassador program and \$50000 airdrop are open now**

Utopia is a metaverse project that transforms everything into blockchain. Enjoy GameFi, DEX, decentralized lending, NFT marketplace, and more DeFi apps all in one in Utopia universe. It is the first-ever project that utilizes stablecoins as its ecosystem token.

Blockchain and the metaverse have been the center of attention for years. As enthusiasm from the global audience continues to grow, Utopia promises users an all-in-one metaverse that transforms everything into the blockchain. With multiple practical applications, high-impact use cases, and numerous incentives, Utopia is committed to creating a metaverse project that maps one-to-one with

reality and gives actual value to users to utilize stablecoins and form their own decentralized autonomous organizations.

This month, Utopia is expected to launch testnet and mainnet, Utopia nonfungible token (NFT), Utopia Blind Box, and Utopia trading card game.

Utopia vision

Utopia is run by a team of highly experienced developers in the public chain and decentralized finance (DeFi) field with a Goldman Sachs background and aims to create a parallel universe beyond a metaverse, offering their users endless identities, assets, social status, and, most importantly, infinite possibilities that can be connected with reality.

Users can partake in activities like games, decentralized exchanges (DEXs), decentralized lending, and the NFT marketplace, among others.

Utopia has always set asset safety as a top priority since the beginning of product design. It has passed the smart contract security audit offered by Anchain in the United States.

Users are invited to dive into the Utopia metaverse which is parallel to the real world.

Utopian innovations

Various apps and open ecosystem

Utopia and its developers offer a wide range of different apps, GameFi, DEX, decentralized lending, NFT marketplace, and more.

All apps in one governance token

All apps in the Utopia metaverse are governed by one governance token UC.

110% collateralization ratio

A maximum of \$110 of collateral assets can be minted as stablecoins from \$100, maximizing the funds to enter the Utopia metaverse.

Multi-collateral assets

Utopia accepts multiple coins and multiple tokens to efficiently maximize the funds. NFTs will join the list soon as well.

Innovation mechanism

Utopia introduces Ustablecoins as the only universally legal token in the Utopia ecosystem. Its flexibility and scalability will provide an easy and efficient way for its users to [utilize](#) Ustablecoins and maximize returns.

Multiple streams of profits

All the fees generated in the Utopia ecosystem will be distributed to decentralized autonomous organizations (DAOs) in Utopia including GameFi, DEX, NFT marketplace, etc.

Join the Utopia ambassador program

Whether you are a technical developer, a blockchain enthusiast, or an influential KOL, we welcome people with different skills to join our community and make a positive contribution to Utopia.

We aim to unite capable individuals from around the world and maintain a strong consensus community.

Enjoy these benefits when you join this Program:

- Prizes and awards.
- First-hand official information.
- Priority access.
- Exclusive honorary influence.

How to Join

To join our ambassador program, simply send your inquiry to info@utopiacoin.org. Or you can join our Telegram community @utopia_metavers for more information.
