

WhiteX introduces a new BsC farm, DWHX for better growth and profit

DwhX - A NEW Dimonds That Launching Soon

Mentok, Bangka-Belitung Nov 3, 2021 ([IssueWire.com](https://www.issuewire.com)) - WhiteX has recently launched a BsC Farm, DWHX, or Diamond WHX. It is an ecosystem token that brings parties together and stimulates the target behavior by having cryptographic tokens as built-in incentives. In the new month, they will tell all about the ecosystem that is BsC farm. They will also tell about privileges like stake whx and get dwhx stake dwhx to get whx, stake dwhx and get busd, and many things. Even they did audit by CertiK and by this ecosystem as the team said. They can also see that all the whx holders and dwhx holders will get a huge profit after this. With this new launch, the dwhx and whx will grow more immensely. They said to raise an initial DEX offering or IDO for the launch so we can grow better and make more profit.

They decided to distribute the ecosystem as Of DWHX IDO Sale As 5% team, 40% pancake, 5% whx buyback, 20% mining zone (stake dwhx and get bnb, cake, busd), 10% cex listing & dwhx buyback, 10% cool marketing and product development, 10% ecosystem upgrade & whx development. The company believes that the token will flourish rapidly and will be a great investment for the future. It will help the WHX ecosystem to grow effectively.

DWHX is a diamond token of a native ecosystem of WhiteX that will be used on a farm. It will have a good price due to its utility and ecosystem and control by whx team. For more information, visit them at <https://whitex.tech/>.
