

Great Updates: AVCLabs Video Enhancer AI Version 2.0.0 Released!

Glenfield, Auckland Dec 8, 2021 ([Issuewire.com](https://www.issuewire.com)) - Great Updates: AVCLabs Video Enhancer AI Version 2.0.0 Released!

In order to meet customers' demands, [AVCLabs Video Enhancer AI](#) Version 2.0.0 is released! It is an intelligent AI product that can enhance and restore video quality automatically with the power of AI. Although the first version has done a great job on **enhancing videos' quality**, deblurring footage, upscaling videos from 480p to 1080p, 1080p to 4k, and 8k, convert low-resolution videos to high ones without losing quality, we still update the program to let our customers get a better product using experience. **A whole brand new program** not only optimizes the functions and interface but also a major update on supporting more graphics acceleration and video formats. Let's check more detailed information about Video Enhancer AI 2.0.0 together!

What's new about AVCLabs Video Enhancer AI Version 2.0.0?

1. Optimize program function and interface.

As an intelligent AI video enhancer tool, AVCLabs Video Enhancer AI can improve video quality 100% automatically. But we didn't stop perfecting the program, so the 2.0.0 version has a better performance

in the processing speed and gives the user a smoother operating experience.

We also beautify and simplify the interface to make the program more friendly to users. The program itself will do all the professional work and users only need to give easy orders.

2. Free up your computer storage.

Compared to version 1.0.0, version 2.0.0 takes much less space as the software package and components together are only 1.3 GB. So don't worry about if the computer has enough space to download the program

3. Support more video formats.

Almost all the normal video formats like 3G2, 3GP, AVI, DIVX, FLV, F4V, M2TS, MTS, MOV, MP4, M4V, MPEG, MPG, DAT, MKV, OGM, RMVB, RM, TS, TP, VOB, WMV, WTV, ASF, DV, WEBM, etc have been supported by AVCLabs Video Enhancer AI version 2.0.0.

4.30 seconds preview function.

A total new function: you can preview the converted video for 30 seconds before processing. So you can adjust your settings to get the admired result you'd like. This 30s preview function can help you avoid many unnecessary troubles.

5. Support the latest Windows 11 system.

Windows 11 system had been released for a while, and the AVCLabs team also had put the plan of supporting the latest system on the agenda since it was released. So after comprehensive tests, AVCLabs Video Enhancer AI officially announces to support Windows 11 system. And of course, the former system Windows 10 (64bit only) is also supported.

6. Support more graphics acceleration.

AVCLabs Video Enhancer AI version 2.0.0 also adds the support of graphics acceleration with Nvidia, AMD, and Intel for the computer **after Win 10 1903**. For computers before Win 10 1903, AVCLabs Video Enhancer AI only supports graphics acceleration with Nvidia (NVIDIA RTX series is recommended).
