

Guild Games - India's First & Largest Gaming DAO

We are building the world's largest DAO for Gamers. made with Love from India. Made for the World

Bengaluru, Karnataka Dec 20, 2021 ([Issuewire.com](https://www.issuewire.com)) -

The unemployment rate in India since the Pandemic has doubled and now that we have the highest millennials in the world, their life looks grim given the existing career avenues. These avenues cannot guarantee 100% jobs for the unemployed 16.56 crores, especially for the blue collared ones. Online Gaming is one such solution that offers the unemployed to play and earn. Yes, you heard that right. Earlier, we paid and we played the games and now the tables are turned. Now, you play and you earn.

These games are not your ordinary run-of-mill, these are the blockchain games, and the one that is making news since last year is Axie Infinity which saved many Filipinos from post-pandemic hardship. The total population of the Philippines is around 11 crores, out of which 41% are earning from playing Axie Infinity (Remember Pokemon Game? Now Imagine Pokemon on Blockchain, that is Axie Infinity for you). That's nearly half the population. Let's convert that stats to our Indian population. 12% of our population is unemployed as I write this and that translates to 16.56 crores. Blockchain gaming technology combined with community building has an untapped reservoir right under our nose and that potential will bring a notch-up in India's GDP growth.

Guild Games is India's first Decentralized Autonomous Organization (DAO) and is bridging gaps with other Gaming Guild to collaborate with us and our vision is simple. We want all of our Indians to earn through our Guild Games platform. We have already selected 40 Scholars for the most popular Axie Infinity blockchain game and we are collaborating with SolChicks, Elpis Battle, and Kaby Arena. We are on our way to collaborating with 300 more such games and the most ambitious ones are Star Atlas and

Born to Die. If Axie Infinity was a trendsetter on #PlayToEarn, then these two games are game-changer in the blockchain world.
