In addition to answering questions about increasing income and attracting buyers, Neurogym also covered how to create irresistible offers during the training without having to lower your prices. The challenge reviews, in-depth, the psychological triggers that enable clients to buy.

Guy Sohie, COO of a small medical device company, states that working with John and the lessons taught in his breakthrough challenge has helped his company grow annual revenues from \$5MM to \$17MM.

The full agenda of this challenge includes, but is not limited to:

Creating Irresistible Offers – Learn how to create the offer that fits your ideal client and repels the “problem customers” using marketing tactics that stand out from the crowd. Understand the tactics to earn your prospect’s trust prior to asking them to buy.

Unlock neurological buying triggers – review the scientifically proven methods to get customers to buy. Learn how to use “Neuro-marketing” approaches that connect emotionally with prospects to make them feel safe and secure in their buying decision.

There are only a handful of people in the world teaching this type of stuff.

The good news is that one of them is John Assaraf (whom you probably know from “The Secret”).

John has personally used these “Neuro-Marketing” tips to build a vast salesforce, generate millions of leads, and coach thousands of people to achieve their business goals faster.
