

Medical Chatbot Singapore launch by Asia MD Pte Ltd

Free bilingual platform with 'Ask-A-Doctor' service to get second opinion from top medical specialist doctors in Singapore launched by Asia MD

Singapore, Singapore Dec 14, 2021 ([Issuewire.com](https://www.issuewire.com)) - With growing demands to get the best medical advice from medical specialist doctors, **Asia MD Pte Ltd** from Singapore has launched [Medical Chatbot Singapore](#), its 'Ask-A-Doctor' service in November 2021. In addition to having accurate medical articles that are fact-checked by Singapore's top medical specialists, its website www.AsiaMD.com will link users to medical specialists quickly with zero fuss.

The Medical Chatbot ([Ask a Doctor](#)) service is free-of-charge. It caters to users in both English and Mandarin language. Users can now send medical questions (including blood tests, CT scans, or MRI scan reports) to their healthcare team via its *intelligent Medical Chatbot* 'Ask-A-Doctor' page. On the backend, the Medical Chatbot Singapore team will then proceed to direct the questions to its network of top medical specialists in Singapore. Most notably, the team will direct the questions to the correct medical specialist doctors with specific sub-specialty skills or training for maximum efficiency.

Even for the same [disease or medical condition](#), each person will have unique and specific questions. For example, how do you know if your heart problem needs to be solved by heart specialists who have sub-specialty training and can handle 'interventional cardiology', 'advanced cardiovascular imaging', 'cardiac electrophysiology', or 'cardiothoracic surgery'?

The 'Ask-A-Doctor' Healthcare Chatbot service will take care of that for you. All for free!

What you need to do is decide whether you want to get a second opinion from these specialist doctors for proper face-to-face medical consultation. And as they say, the rest is up to you!

This will save your time to get direct access to experienced expert specialist doctors in private hospitals. Additionally, users can decide and choose the most appropriate medical doctor with sub-specialist training and skills for their specific medical condition.

With *Medical Chatbot Singapore @ Asia MD*, medical specialist doctors from any private practice or hospital in Singapore are within reach. The website is independent of all healthcare groups or organisations and thereby, will give you a choice to see any medical specialist doctors in Singapore who can best manage your medical problem.

Furthermore, this "Ask-A-Doctor" service is great for those who require a second medical opinion. With your blood tests or X-ray reports ready, fire those questions away to a completely new doctor for a fresh perspective on your medical condition.

A caveat applies. Obviously, this mode and line of medical enquiry are not for emergency cases. Users who have severe and acute pain or need immediate medical attention should call for emergency help at hospitals.

In addition, Asia MD also has a 'Chatbot Nurse' to complement our 'Ask-A-Doctor' service. Users who are merely curious about certain non-pressing healthcare matters can use this chatbot for more general questions.
