Bankroll AJ -"As time flew I really understood the systems of how everything works and still going through processes of learning the music industry for self. On top of being an inspiration to my loved ones and the people in my circle, never knew how quickly things could change for me. But always had the vision for change got tired of seeing my mom's slave away for money and was tired of being the victim of every bad outcome so I stayed committed stay down. Staying in tune with what I believed and doing that it got me in this position to make a generation change for years to come. No more suffering no more poverty, all I needed was the platform I been had the plan".
