

Mind founder Daniel Aguilar offers inversion opportunities at all levels

A new fintech born in Medellin, the MIND ecosystem will allow to live the economic transition of the traditional market towards cryptographic digitization through its own tokens and a collection system for all business.

inversion opportunities at all levels

A new fintech born in Medellin, the MIND ecosystem will allow living the economic transition of the traditional market towards cryptographic digitization through its own tokens and a collection system for all establishments with a revolutionary method of crypto rewards. Colombia continues to stand out as a blockchain hub for innovative projects with international projection.

MIND is the result of years of study and research by groups of professionals from several countries led by Colombian investor and crypto analyst Daniel Aguilar: "We are offering investment opportunities for all levels through franchises, tokens, and NFTs, because we are creating a community where everyone benefits, and everyone can improve their finances by entering the crypto world in a simple way, in Mind we offer the technology and experience and we will guide them in this process.

MIND also offers the possibility for artists to exhibit and tokenize their works in the digital world by offering them in its Open Sea gallery MINDART_GALLERY. On December 2nd MIND presented a private event at its first crypto café in Medellin for Family and Friends where they sold an NFT from the exclusive Monastery brand in collaboration with local artists from the Zoolandian gallery.

The next event on December 16th will be the official launch of MIND at the exclusive Icon Resort in Medellin where product demonstrations and NFT art exhibitions will be held in an exclusive environment.

Among the international expansion plans, MIND arrives in El Salvador in December to establish its first franchises and finance system for businesses, bringing a financial solution for the use of crypto. They will also be present at the Crypto Latin Fest at El Tunco beach on December 3 and 4. It is projected that in the next year they will open 100 franchises starting in Guatapé, Bogota, Mexico, and Dubai.

MIND is a community with decentralized technology to be integrated into the traditional system and achieve greater economic benefits. Where the art of NFT, token transactions, and international expansion will allow users to live experiences of growth and quality of life.
