

My Air Shield™ Badge offers protection against bacteria and spores, including Corona Virus variants.

Atlanta, Georgia Dec 8, 2021 ([Issuewire.com](https://www.issuewire.com)) - Americans are not out of the woods yet in the battle against the COVID virus, and The My Air Shield™ Badge is adding a layer of protection for in-person gatherings. From the workplace to schoolhouse to concerts and conferences families are living with the uncertainty of this dreadful disease. Innovative entrepreneur Jennifer Barbosa, the owner of International Supply Partners, has taken center stage in this fight. Ms. Barbosa's world-class company (ISP) stands ready to meet growing demands for PPEs.

Since 2016, Jennifer Barbosa has had her finger on the pulse of businesses to supply their sanitation and janitorial needs. Ms. Barbosa leads the pack by introducing ISP's newest product, which is on the cutting edge of total protection. The My Air Shield™ Badge can be used in closed and crowded spaces, like hospitals or public transport, arenas, or in private homes, as an additional disinfectant measure for office staff, elderly people, children, and the public in general. Additionally, it is designed for everyday use, the badge provides an extra layer of defense against viruses, bacteria, and spores, such as: mold and fungus. The badge bolsters up to 90 days of invisible air disinfection around the wearer. Most importantly, it is clinically tested and approved by the Food and Drug Administration (FDA), the Federal Committee for Protection from Sanitary Risk (COFEPRIS), and European Chemicals Agency (ECHA) to be effective against the **Coronavirus**.

According to figures from the Centers for Disease Control and Prevention (CDC), during the first week of November 2021, the average number of new COVID-19 cases increased to nearly 75,000 a day, about 10,000 more than a week ago. As if that was not enough, flu season is upon us, which increases deadly exposure to germs exponentially. New cases mean the continued need for PPEs is likely, and ISP stands equipped to satisfy that need. With hundreds of tankers hovering off the California coastline, some suppliers are running scared, but fully stocked ISP warehouses are ready to serve the community.

The forward-thinking company has over 100,000 high-quality products such as COVID-19 Biohazard Equipment and Medical Supplies and Equipment, Medical/PPE Supplies, Office Supplies, Office Furniture, Janitorial Supplies, and Industrial Supplies.

Thanks to revolutionary products like the My Air Shield™ Badge, we can reconnect as a country and global community.
