

Secure Delivery Announces New Partnership With Snyk

Secure Delivery will join as Snyk's latest channel partner bringing end-to-end secure digital product development across the whole organisation

London, United Kingdom Dec 9, 2021 ([IssueWire.com](https://www.issuewire.com)) - Secure Delivery today announced its channel partnership with Snyk, the leader in developer security. The new partnership will combine Snyk's leading developer security tooling with Secure Delivery's proven security coaching, consulting, and managed services to accelerate the vigour of security capabilities in digital delivery organisations worldwide.

People, process, and technology are at the heart of any scalable security transformation, and focussing on all three will elevate an organisation to world-class security capabilities. Secure Delivery's people-first approach and deep expertise in secure product delivery, alongside Snyk's leading developer tooling, will maximise security capabilities and ROI for our clients' investment in securing their digital product delivery.

"Snyk has long been a favourite tool of ours for helping development teams get the insight they need into their systems to really understand the security quality of their work and defend against supply chain attacks" said Toby Irvine, CEO of Secure Delivery. "We're really happy to form this partnership and offer our combined, full-service offering for raising security capabilities and quality across the whole of our client's organisations."

"We're very excited to further our relationship with Secure Delivery and bring them on as a channel partner" said Udi Nachmany, VP EMEA Alliances & Global Cloud Alliances, Snyk. "As the demand for

developer security grows we are always looking to expand our partner ecosystem and help businesses all over the world capitalize on that opportunity. Our latest partnership with Secure Delivery will help us continue our mission to empower developers all over the world with dev-first security by offering our mutual customers the ability to integrate Snyk into existing workflows, tools, and processes while helping Secure Delivery's clients accelerate their move to DevSecOps."

Notes to Editors

About Secure Delivery

Secure Delivery transforms and advances digital product security across all industries with a people-first focus on building clients' in-house capabilities to address this challenge. Our world-leading experience and expertise mean we understand the complexities of accelerating the delivery of digital services while maintaining quality and security.

We work with enterprise technology delivery teams across regulated industries to instill security knowledge and raise security capability. Our services provide assessment, advisory, and training to all parts of the organisation to deliver maximum effectiveness of security transformation whilst accelerating delivery speed and removing the security bottleneck.

About Snyk

Snyk is the leader in developer security. We empower the world's developers to build secure applications and equip security teams to meet the demands of the digital world. Our developer-first approach ensures organizations can secure all of the critical components of their applications from code to cloud, leading to increased developer productivity, revenue growth, customer satisfaction, cost savings, and an overall improved security posture. Snyk's Developer Security Platform automatically integrates with a developer's workflow and is purpose-built for security teams to collaborate with their development teams. Snyk is used by 1,200 customers worldwide today, including industry leaders such as Asurion, Google, Intuit, MongoDB, New Relic, Revolut, and Salesforce. Snyk is recognized on the [Forbes Cloud 100 2021](#), the [2021 CNBC Disruptor 50](#), and was named a Visionary in the [2021 Gartner Magic Quadrant for AST](#).
