

The First Metaverse in MENA Introducing Metatron from Abu Dhabi to the world!

A Metaverse for creators who are willing to be a part of the NFT revolution where digital goods turn into tangible products that are tradable!

METATRON

Abu Zabi, United Arab Emirates Dec 13, 2021 ([IssueWire.com](https://www.issuewire.com)) - Why is it different than any Metaverse on the rise out there?

A Metaverse in your pocket!

Metatron has a unique approach to the market to offer everybody the chance to have their own space and then have the ability to sell it as an NFT, to explain Metatron in a simpler way to understand imagine Instagram but instead of swiping down to check images and videos you will be able to swipe through rooms in the Metaverse where each room will have a purpose! Where it's possible to post videos and pictures within the room to showcase it for other visitors to your own space in the Metaverse.

The chances of people getting a VR headset and getting into an open space Metaverse is not yet reliable to involve everyone in the Metaverse therefore Metatron decided to choose mobile platform as the main platform to engage with it straight from people's pockets (phones)!

Multi-purpose rooms:

Every room will consist of functionalities that will reflect the collector's purpose in the Metaverse.

1. Rooms to play games:

Metatron is the first platform to offer entire games that will be sold as NFTs.

2. Rooms to showcase NFTs:

NFT artists will have the opportunity to showcase their artwork and sell their rooms as NFTs.

3. Involving businesses in the Metaverse:

Allowing businesses to integrate into the Metaverse and harness the power of engagement towards their platforms.

4. Influencers:

Offering a place for influencers to post their latest videos within the rooms and helping them drive more

traffic towards their social media accounts.

An Example of the rooms as NFT:

This NFT drop which is going to be called Metatron Meta cards will offer the collector the privilege of having a Hyper Casual game that can be monetised within the Metaverse. The more visits the room owner gets the higher in value the room will turn out to be!

[Here is a link](#) to the first room to be sold in the upcoming Metaverse:

Metatron will help transition everyone from social media to the Metaverse!

The ability to explore spaces in a metaverse directly from your phone is still not yet established in the market and that's how Metatron decided to pioneer the journey of a great transition from social media to engaging into the metaverse without the need of using VR headset as a kickstart to penetrate the market!

When will this revolution start?

Stay tuned on 1/1/2022 where SIFOR will give birth to the first Metaverse in the MENA region!
