

## Timesnap: Daytime Stamp Camera

Surat, Gujarat Dec 16, 2021 ([Issuewire.com](http://Issuewire.com)) - Timesnap: Daytime Stamp Camera

*Available on Google Play Store*

Master Apps lab is excited to announce the release of the new app.” [Timesnap: Daytime Stamp Camera](#)”. It is an application that will allow you to add date time watermark on your photos and videos with various stamp styles and templates.

By having a timesnap app you can easily **timestamp** the current date and time to the stunning videos and pictures which you capture using the timesnap camera app.

Not only that, but with the **timesnap camera**, you will also be able to add custom dates and timestamps to the photos and videos that you capture, as well as you can add those templates to those pictures and videos that are available on your phone gallery.

Furthermore, the date and timestamp **templates** are designed in accordance with your different moods which makes the pictures and videos look much more amazing

The CEO of the Master Apps lab Company during the lunch of the app found said “I am very excited to launch our new app “Timesnap: Daytime Stamp Camera”. The app works just like the normal timestamp camera applications, but the cool templates which are designed by keeping **human emotions** in mind, make the app stand out from many other apps that are available in the market, I hope that the application will be of utmost use to any people”.

## Why Timesnap Camera Application?

- It will address all your date and time-related issues.
- A free camera app, that allows everyone to photo and video timestamp all of their memories.
- Use this timestamp camera whenever or wherever you want, and share your memories with your loved ones.
- Select different **time and date stamp templates** from a variety of options based on your moods.

Add handmade custom stamps to your pictures and videos following your different moods. The app supports the device having O.S version 4.2 and up.

Keep **exploring** and keep gathering **memories**, Start snapping today with the Timesnap camera app.
