

Best After-Christmas Sales 2022: Up to 60% Off Leawo AI Photo Editor - Photolns

Leawo Software recently launched their after-Christmas sales to celebrate the 2022 New Year, offering up to 91% off bundles, and chance to win iPhone 13 Pro Max, Amazon gift card and Music Recorder for free.

Shenzhen, Guangdong Jan 11, 2022 ([Issuewire.com](https://www.issuewire.com)) - It is time to say goodbye to 2021, but it doesn't mean that it is also time to say goodbye to sales and deals. In fact, the New Year has already ushered in a slew of markdowns, and many retailers are celebrating by dropping huge deals across all categories. Leawo Software, a leading developer and supplier specialized in multimedia solutions and data management software, also launched their [2022 New Year Contest, Giveaway & Specials](#) online sales to celebrate the 2022 New Year. Until Jan. 20th, 2022, people can enjoy up to 91% discounts on their hot-selling bundles and singles and will have a chance to win iPhone 13 Pro Max, Amazon gift card, and Music Recorder for free.

From traditional customs to seeking blessings from the elders, different people follow different traditions to get the luck and good fortune that they wish for. Still, though, taking memorable photos in New Year means more than get-together in such a special period. In order to help people beautify their photos and memories, Leawo Software specially offers their AI photo editor – [Photolns](#) with up to 60% discount. During this event, people can get 60% off Photolns in Leawo All-in-One Package, or purchase it separately with a 50% discount. That is, compared to its full price people can save up to \$41.97 for this 2-in-1 photo toolkit. Below is a detailed introduction to Leawo Photolns.

Consisting of [Photo Enhancer](#) and [Photo BG Remover](#), Leawo Photolns is designed as an all-featured but easy-to-use photo editor. In the past, photo editing used to be done manually with Photoshop or Lightroom, though there are still professional graphic designers doing so. But now, with the development of Artificial Intelligence, AI photo editors can help people do most things. Powered by advanced AI technology, Photo Enhancer can automatically enhance photo quality in batch through exposure and white balance adjustment, colors and tints boosting, contrast and sharpness optimization, and more. Besides, acting as a portrait enhancer, Photo Enhancer can also perfect figures by retouching skin, removing freckles, enlarging eyes, etc. As a new module, Photo BG Remover offers the best solution to remove photo background in batch. Once the photos are imported, it will automatically and intelligently

analyze the clipping edges, and then precisely remove background from images in batch. Certainly, manual adjustment for more precise photo background removal is also supported. After background removal, users can also change and edit photo background at will, and all edited photos can be output in batch.
