

Chloé + Crown Announces New Launch Of All-natural Organic Candles And Home Fragrances

The Montréal based makers of all-natural premium soy candles and essential home fragrances made by hand using only certified organic, kosher, and vegan ingredients.

Montreal, Quebec Jan 12, 2022 (Issuewire.com) - Chloé + Crown was created with a simple idea in mind: create handmade, beautiful soy candles only using natural ingredients. We live and support local with our studio located in the beautiful town of Hudson, Quebec, about 30 mins West of Montreal, allowing us to sell but also buy from local vendors and suppliers.

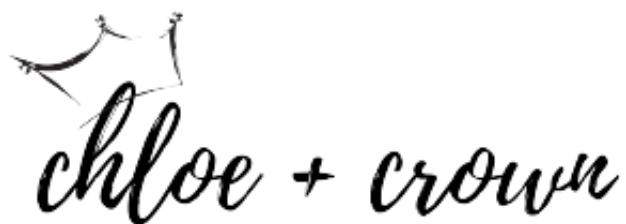

From candles, we expanded into organic, all-natural room diffusers, organic shower steamers, and all-natural solid perfumes and colognes.

Our candles are made with pure organic soy wax sourced from local soybean farmers, and we use phthalate + paraben-free fragrance oils or pure essential oils in our candles.

From our glass candle jars to our glass essential oil vials, all of our containers and packaging are made with recycled and reusable materials. even our product labels are made from recycled cotton and linen paper, and adhered to using non-toxic all-natural glue.

It is worth noting that our wooden wicks come from FSC certified mills and our cotton wicks, are just that, cotton.

By 2022 we are expanding our retail and partner ecosystem and are looking to partner with like-minded retailers to feature our products. Visit us at www.chloeandcrown.com to find out more.
