

Clearlight Infrared® - Makers of Jacuzzi® Saunas - Takes Disinfecting to the Next Level This Winter Season

Infrared Sauna Leader and Global Wellness Company Launches New UV Disinfecting Wand That Kills 99.9% of Germs/Bacteria & Viruses Within Seconds

Berkeley, California Jan 4, 2022 ([Issuewire.com](https://www.issuewire.com)) - Just in time for the Winter, [Clearlight Infrared](https://www.clearlightinfrared.com)®, a global wellness company and leader in the infrared sauna space, creating environmentally friendly and eco-conscious saunas using non-toxic materials, offers the new Jacuzzi® UV Disinfecting Wand. The Disinfecting Wand uses UVC/UVA mixed wave light technology that has proven to kill up to 99.9% of germs, bacteria, and viruses off of surfaces.

“We realize the pandemic has caused people to look for ways to clean their home and the environment around them without having to use toxic or alcohol-based products. Clearlight Infrared Saunas™ created the wand to make disinfecting easier, quicker, and more environmentally friendly,” said Andy Kaps, President at Clearlight Infrared.

The Wand is doctor-designed with UV-C wavelengths of 270-280nm and with UV-A wavelengths of 380-405 nm, making it up to 10 times stronger than other UV disinfecting lights on the market.

This **new eco-friendly and non-toxic** tool is great for cleaning your gadgets (keyboard, phones), your home (kitchen counter, dining table), your car (steering wheel and seats), or even the public surfaces that you simply can't avoid touching (airline tray tables, shopping carts). It's the perfect on-the-go tool for parents, college students, senior citizens, and airline personnel.

The Jacuzzi® UV Disinfecting Wand can be purchased directly from Clearlight for a retail price of \$299 by visiting <https://infraredsauna.com/uvc-wand/> and calling 1-800-798-1779.

The UV Wand charges fully in an hour and comes with safety goggles, gloves, and a carrying case. The UV Wand has been developed and assembled in the US and is 100% ozone and chemical-free. Additionally, Clearlight Infrared® offers a one-year warranty on their Jacuzzi® UV Disinfecting Wand purchases.

Their sauna technology has been in high demand since the pandemic has forced people to stay

sheltered and look for ways to assess and improve their daily wellness routine.

“Being able to provide the public with technology that can aid in increasing people’s overall wellness without exposing them to unnecessary toxins is what makes us a leader in the infrared sauna industry,” said Bruce Weinberg, Clearlight’s Director of Marketing.

About Clearlight Infrared® – Makers of Jacuzzi® Saunas

Founded by a Chiropractic Physician, Dr. Raleigh Duncan, Clearlight Infrared® has been an industry leader for the past 20 years. Clearlight Infrared was the first to pioneer the Carbon/Ceramic infrared heaters capable of delivering a deeper, more penetrating infrared wavelength, along with the lowest EMF (electromagnetic fields) available on the market. Each Clearlight Infrared Sauna™ model is manufactured with the finest Grade-A Clear Western Red Canadian Cedar or hypoallergenic Basswood. Moreover, they are the only infrared sauna in the world to offer a full lifetime warranty for all their in-home models. To learn more, visit infraredsauna.com.
