Mumbai, Maharashtra Jan 29, 2022 (Issuewire.com) - Kuche7's Stainless Steel Modular kitchens have emerged as the most popular choice for modern homemakers.

Kuche7 marks a brand new addition to the modular experience with its newly inaugurated experience center at Coimbatore. The grand opening of the [Kuche7 Coimbatore showroom](#) laid the empire's expansion.

Kuche7 is a national forefront company emerging in the modern kitchen interior industry. Kuche7 was one of the first brands to pioneer the notion of stainless steel modular kitchens, having been founded in 2017. Since then, it has been steadily increasing its footprint across India. With more and more additions to its experience centers, Kuche7 emerges as a people's popular choice in the Kitchen Industry.

On 17th November 2021, Kuche7 inaugurated yet another experience center at Coimbatore. The showroom is located at 241, T V SWAMY ROAD EAST, R.S.PURAM, Coimbatore, Tamil Nadu 641002. Industries renowned Architects and Interior Designers were a part of the event. The inauguration ceremony witnessed the presence of users, experiencing the regal hospitality of Kuche7. The showroom is treasured with aesthetically pleasing [stainless steel modules of modular kitchen](#), wardrobes, and vanity units. There are almost 20,000 color variations available, along with decorative finishes. The smart placement of modular kitchen accessories solves every Indian kitchen problem. Each of the display units is carefully crafted in the most charming finishes. Kuche7 provides some of the most stunning finishes to uplift the aura of the entire kitchen. Clubbed with the new age in-built appliances makes Kuche7 ideal for modular kitchens onlookers.

The addition of the new store is another stepping stone for Kuche7. The ceremony bore witness to various founders of Kuche7. The sales crew provided informative insights to everyone during the ceremony. The Kuche7 staff demonstrated the smooth workability of the smart appliances and modern modular kitchen accessories. An introductory to the modular kitchens, wardrobes, and vanities left the onlookers agape.

Kuche7, as a company, specializes in modular kitchens made up of stainless steel only. The [304 Food Grade stainless steel](#) is used to make every modular kitchen. This grade is used in the medical sector to achieve the highest level of sanitation during medical procedures. Being a non-porous material makes stainless steel modular kitchens the easiest to clean & maintain. Each unit is meticulously designed to stand firm against harsh weather. Qualities such as fire-resistant and noiseless make stainless steel stand out from other kitchen materials.

The stainless steel modular kitchens, wardrobes, and vanities modules are customized to maximize functionality. The hardware fittings in these modules are top-notch industry favorites such as Blum, Hafele, etc. With trendy innovation, these modules have gained a lot of likings amongst the users. The employees are well equipped with adequate knowledge to provide genuine and honest answers to the consumers. Along with showrooms spread all across the Indian horizon, [Kuche7](#) provides its services PAN India. That means, regardless of where you reside, you can experience the service of Kuche7. On

the other hand, the social handles keep the users updated with the industry's insights and provide valuable kitchen hacks to ease the life of the modular kitchen owners.

Along with durability, stainless steel modular kitchens are also sustainable as, unlike traditional wooden kitchens, it does not require cutting down trees. It eliminates any potential for insect infestation and ensures an incredible level of sanitation. Not only this, but it also provides a lifetime warranty with each stainless steel modular kitchen purchase.

"Being the alloy of the two most robust metals on earth makes stainless steel ideal for Indian kitchens," says Naeem Chauhan, the co-founder of Kuche7.

"I think this product is a need of an hour right now, in India With the amazing varieties that they produce, I think any kitchen is going to look amazing." says Ar Manish Dikshit from AUM Architects.

"I feel like Stainless steel is a really effective material used, because most high-end commercial kitchens around the world, internationally use it, because of its durability and lack of maintenance," says Ar Krish Kothari (Founder of Krish Kothari Designs).

"I decided to go with [Kuche7](#) for my kitchen. I was really pleased with my choice. It was a stainless steel option to avoid all the hassles of a wooden traditional kitchen. It's very practical in terms of long term use, the hardwares and other things that go with it." says Mrs. Hargunn Jayaswal, CEO of Oxys Learning.

The rise in the e-commerce industry demands new approaches to make physical showrooms available for savvy shoppers. Instead of relying on virtual brochures and videos, consumers now have the privilege to have a hands-on feel of the potential purchase. These experience centers provide the users with a natural touch of the product's material, quality, accessibility, and many more.

[Kuche7's Coimbatore experience center](#) is a must-visit for every homemaker hunting for the ultimate kitchen solution. Interior designers, design enthusiasts, etc., can surely use this newly inaugurated showroom for some new-age design inspiration. To experience an evening of astonishing kitchen design, one must undoubtedly pay a visit to Kuche7's Coimbatore showroom located at 241, T V SWAMY ROAD EAST, R.S.PURAM, Coimbatore, Tamil Nadu 641002.
