Chiropractic is a form of alternative medicine that mainly deals with the diagnosis and treatment of mechanical disorders of the musculoskeletal system, especially the spine. A chiropractor uses spinal adjustments, manipulation, and other techniques to manage patients' health concerns, including neck pain and back pain. They aim to improve patients' functionality and quality of life by properly aligning the body's musculoskeletal structure and enabling the body to heal itself without the use of medication or surgery.

With more than 40 years of practice, Dr. Mager's experience, education, and mission work demonstrate her passion for chiropractic care. Offering chiropractic care to those in desperate need around the world, she performed 16 short-term medical/dental missions with Hand of Hope from 2009 to 2015.
