Boswellia Frereana

Delhi, India Jan 11, 2022 ([Issuewire.com](https://www.issuewire.com)) - The Frankincense tree is a scraggly but hardy tree that originates from Oman and the Middle East. By slashing the barks of the tree, a sticky, fragrant resin is produced from which the Frankincense oil is derived. This variety of Frankincense was originally grown in Oman (Frankincense from this country is considered to be the best in the world) but distilled in India.

Frankincense is from the French word 'Franc' meaning 'luxuriant' or it could be 'real incense'. Also

known as Olibanum, Frankincense was used by the ancient Egyptians as an offering to the gods and as a rejuvenating face mask.

Frankincense oil is highly prized in the perfumery industry and in Aromatherapy. The therapeutic properties of Frankincense oil include use as an antiseptic, astringent, carminative, digestive, diuretic, sedative, tonic, and expectorant.
