**Accelerating Sustainability Growth with Industry-leading
ESG Software and Reporting Services.**

Indore, Madhya Pradesh Jan 11, 2022 ([IssueWire.com](https://www.issuewire.com)) - Infinite Solutions, a renowned Climate Change & Carbon Consultancy, and ESG Enterprise, a SaaS and data analytics company, are pleased to announce a global strategic partnership, combining Infinite Solutions' expertise in Climate Solutions, Sustainability Reporting, Energy Management, and Carbon Management with ESG Enterprise's industry-leading ESG software and data services.

The links between ESG, company strategy, and risk have never been clearer than during the COVID-19 pandemic when companies have had to quickly pivot and respond to critical risks that previously were not considered likely to occur.

The unlikely scenario of a pandemic causing the magnitude of economic disruption seen today has caused many businesses to reconsider how they maintain their long-term viability. The re-calibration of risk in the face of a global pandemic emphasises the interplay between corporate strategy, the environment, and society.

ESG factors are becoming a key determinant of financial strength. The sophistication of investors in particular, as well as other stakeholders, continues to increase. There's a whole universe of information out there that empowers users of the information to challenge the credibility, quality, and accuracy of disclosure.

Infinite Solutions & ESG Enterprise has come up with an adaptable method for keeping up with rapid tempo around ESG development where we can tailor our approach to help you prioritise, integrate, and deliver non-financial reporting insight that promotes stakeholder trust and value, regardless of where you are on the sustainability spectrum, using the modern digital methodology.

“The ability of Earth to regenerate the resources that we consume; i.e., Earth Overshoot Day was on 29th July 2021. It was on 30th December in 1970, the trend clearly shows the alarming situation we are in and how we are consuming the resources of our future generation. We plan to be associated with entities to mitigate the impact and the first step in the fight is to estimate the current levels of impact that we create. With the Partnership with ESG enterprise we expect to map and assess the baseline impacts of the companies and then work on a roadmap to improve its performance and ultimately reach a sustainable level.” – Jimmy Sah, COO & Co-Founder – Infinite Solutions.

"We are extremely proud and excited to be in partnership with Infinite Solutions and able to offer integrated ESG solutions to the local market. We feel the timing is right with the projected ESG growth across all sectors in India and view ESG as a dynamic landscape, bringing great opportunities in our partnership." - Alan Lee, President of ESG Enterprise.

About Infinite Solutions

[Infinite Solutions](#) is a multinational “Environment & Sustainability Consulting Company”, having its presence in India, the UK, Canada, Turkey, and Kenya. With Infinite Solutions’ in-depth experience, they are supporting private and public sector organizations by imparting tailor-made solutions to achieve Climate Change and Sustainability objectives. Core competencies cover products and services related to Waste Elimination, Water Management, Green energy, Carbon Neutrality, Green Investments, Carbon Emissions, and Project Development. Infinite Solutions also provide consulting for emissions trading services as well as Trading of Carbon credits.

About ESG Enterprise

[ESG Enterprise](#) is an Environmental, Social, and Governance software, SaaS, and data analytics company designed to help businesses, NGOs and governments simplify their ESG journey with integrated and Artificial Intelligence-driven platforms. As a result, organizations can take control of their ESG performance by reducing ESG risks, automating reporting and data collections, managing disruptions, and capturing opportunities in the transition to sustainable growth and a low-carbon economy.
