

QuickField 6.6 with the brand-new Model Editor is released

FEA software for Electromagnetics, Heat Transfer and Stress Analysis

Svendborg, Fyn Jan 26, 2022 (IssueWire.com) - Tera Analysis ApS with headquarters in Svendborg (Denmark) announces the release of the FEA program QuickField 6.6. It features a brand-new Model Editor, which has been written from scratch. Geometric editing is now much easier as we have accelerated all operations and added a new modern look with navigation controls. As a result, even complicated engineering analysis can be performed intuitively and comfortably. Some features of the new Model Editor:

- Highlighting geometric objects when you hover over them
 - Displaying the label of highlighted objects in the status bar
 - Panning instead of scrolling
 - Zooming with the mouse wheel
 - Dragging objects with the pressed ALT key
 - Exporting a picture to a bmp, jpeg, or png-file with a specified size
 - New buttons in the toolbar:
 - Undo / redo
 - Show/hide breaking
 - Show/hide mesh
 - Show/hide mesh spacings
 - Show/hide grid
- Most significantly, all picture displays now respond immediately to every user action!

Detailed information and free QuickField Student Edition are available at www.quickfield.com
