

Schotex Ecosystem Announced One Million SCHOTEX Token Airdrop

SchotEX is proud to giveaway 1 Million SchotEx Token as Airdrop for the community.

Woodinville, Washington Jan 4, 2022 ([Issuewire.com](https://www.issuewire.com)) - Schotex Ecosystem is proud to announce One Million [SchotEx Token](#) Airdrop for the community! We are giving away a total of one Million SchotEX tokens as a shared airdrop to anyone that joins our community and participate by completing the airdrop tasks.

How you can increase your token allocation

The airdrop will include a referral program. Once you register to the Airdrop, there will be a link, unique to each participant, that you can share with your friends to invite them to participate in the airdrop.

Rewards:

The first 5,000 people who complete the task correctly will receive 500 SCHOT Token each

The first 250 people who complete the task correctly will be whitelisted for the SchotEX token presale
The first 10 people with the highest referrers will receive 0.25BNB each

WHAT IS SCHOTEX ECOSYSTEM

Schotex Ecosystem is a decentralized global experiment with a clear plan to bring a new dynamic to the world of community-driven tokens by serving utility & purpose.

The ultimate goal is to create a world governed by the people, that operates in a limitless manner, where every person is prominent in their capacity without limitation from centralized authorities.

Schotex Token is designed to fit perfectly into Schotex Ecosystem as a Governance token which will allow the community to vote on upcoming proposals.

Schotex Token will start as a type of deflationary, community-driven DeFi token that provides passive rewards to holders. bringing new dynamics to the world of community-driven tokens by serving through utility & purpose.

Schotex Token has a strict limit max supply of 152,562,652,400 (one hundred fifty-two billion five hundred sixty-two million six hundred fifty-two thousand four hundred) with no mint function. This means no token can be minted in the future. 79% of the max supply will be burnt through a gradual burning mechanism already in the contract to create scarcity in the market and add more value to schotex token, leaving only 21% of the max supply. Schotex Token Community has the ability to burn tokens as necessary to still reduce the circulating supply from time to time.

From its inception, schotex Ecosystem has done things differently. 0.5% Schotex Token was “sent” to Binance Exchange. The Dev Lead @Jiaschot trusts Binance Exchange to distribute the received token to their users as airdrop at their own suitable time. Binance Exchange having contributed so much to crypto adoption globally is ever willing to do so following our roadmap
