

Solaris Attachments Reveals Their Top Log Splitting and Stump Grinding Attachments Of 2022!

It's time to update your excavator and skid steer with the latest log splitting and stump grinding attachments! Whether you run a land clearing, landscaping, or logging company, we have your back.

Seattle, Washington Jan 3, 2022 ([Issuewire.com](https://www.issuewire.com)) - See our list below of the "Top Log Splitting and Stump Grinding Attachments of 2022"

1. Stump Planer Attachment

The [Stump Planer Attachment](#) is the perfect tool for breaking apart stumps of any size. It allows for easy clearing of land, while producing very little mess and without taking much time. You will be able to complete construction and landscaping projects faster, meeting your deadlines and maximizing your profitability.

Starting at \$986 + freight

2. Shark Tooth

The [Shark Tooth Stump Splitter](#) will be one of the best stump attachments to have in your mid-sized excavator attachment arsenal. Made in the US with AR 400 steel, this versatile stump grinding attachment is more effective for clearing out a stump than a bucket. It makes very little impact on the ground, but at the same time, it does the same job as a larger excavator.

Once the stump is broken up, you can use the Shark Tooth to harvest the pieces. It's quick, it's efficient, and it will get your year of logging and land clearing started off right.

Starting at \$6,900 + freight

3. Rabaud Cone Splitter

Looking for more cost-effective logging attachment solutions? The [Rabaud Cone Splitter](#) is definitely worth your time and money. It adapts to a wide range of excavator sizes to help you split apart logs both large and small. The high-resistance steel cone screw is exchangeable with different types of screws so you can choose the best one for the job. It's far more efficient than switching excavators or attachments every few hours.

Starting at \$7,150 + freight

4. Hydraulic Log Splitter Wood Screw

The [Hydraulic Log Splitter Wood Screw](#) is the ultimate excavator or skid steer logging attachment. The cone, which is 7.5 inches at its widest point, spears through tree logs and splits them into more manageable pieces. If you're dealing with tall trees, don't worry: simply reposition the wood screw on the log to continue following the initial split you made. No need to switch to a larger skid steer or excavator!

This attachment is as convenient to use as it is easy to split logs with. It's designed to hold up under cold

and nasty weather conditions. It also helps you hold up, too: once it's attached to your skid steer or excavator, there's no need for you to even get out of the cab.

The Hydraulic Log Splitter Wood Screw fits nearly any size or type of skid steer or excavator. It only takes filling out one of our forms to get a quote on one that's custom-built for your machine and your log splitting needs.

Starting at \$4,050 + freight
