

Use Remote Curtains from Somfy for Smart Home

Use Remote Curtains from Somfy for Smart Home

New Delhi, Delhi Jan 3, 2022 (Issuewire.com) - The smart home is everyone always desires for and to this end, **Somfy** has brought in **remote curtains** that could be a great product for homeowners. Installing the motorized system, homeowners can manage their curtains in the most effective manner. Talking about the latest technology in the remote curtain segment, the company claims that with its motorised systems homeowners can control all their curtains easily.

According to the company managing the curtains at home is now easy as it can be done using a smartphone or a single remote control. Now, homeowners could effortlessly protect their curtains from tearing and keep them perfectly aligned to the decor. Utilizing modern technology to make things easier at home, the remote curtains are a reality now and becoming essential for homeowners.

Nevertheless, by introducing quiet and connected motors, mobile apps to easily manage the home, the company has brought in smart solutions. These solutions are meant to communicate securely with each other, for greater security and safety of homes.

Easy to Install Remote Curtains

Talking about the remote curtains, Somfy claims that thanks to its easy-to-install wireless motorised system, the homeowners would not even need a costly power connection. In fact, the curtains work perfectly with a built-in battery guaranteed to last. Thus, these are not just energy efficient but at the same time save a lot of costs that the homeowners would have spent otherwise.

The new range of motorised systems was developed to guarantee the homeowners a peacefully quiet home where they can focus on other things than worrying about the curtains. Needless to say, because homeowners and their well-being is Somfy's priority, the curtains open and close discreetly without making any irritating noise when they are operated.

Lastly, to protect and extend the life of the curtains, Somfy has developed efficient high-precision motors that are revolutionary. In fact, with Somfy solutions, curtains will always be perfectly aligned to create an elegant ambiance for homeowners.

About Somfy

In existence for more than five decades, Somfy has been a name to reckon with. With over 50 years of innovation from the first roller shutter motor, heralding the end of the crank handle, to a smart home, the company has been helping its customers quite diligently. Millions of users around the world have benefited from its range of remote curtains and other products. The company makes homes ready for tomorrow's challenge and this is why it is receiving such popularity.
