

WeHear OX, India's first Bone Conduction Audio Device for a healthy lifestyle

Ahmedabad, Gujarat Jan 29, 2022 ([Issuewire.com](https://www.issuewire.com)) - In today's era striking a balance between work, responsibilities, and health has become a priority for everyone. Several reports and surveys have pointed out how opting for an active lifestyle and healthy consuming habits in the 30s can keep individuals healthy even in their 60s. Although more and more people these days are aware of the importance of a fit and healthy lifestyle, challenges like stressful work life and unforeseen situations such as the current coronavirus pandemic have pushed people towards more sedentary attitudes. With more and more professionals opting for work-from-home jobs and students attending classes online, during the pandemic, health issues such as the risk of hearing loss due to unchecked audio consumption, diabetes, and cardiovascular diseases have increased considerably. Of all of these risks related to health, the risk of hearing loss has increased even more as these work from home professionals, online students, homemakers, and fitness enthusiasts are carrying out most of their work and entertainment activities with the help of their headphones, mobile phones, and laptops.

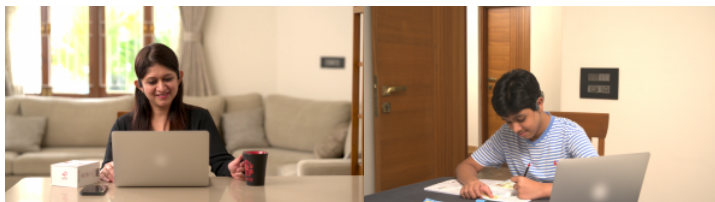

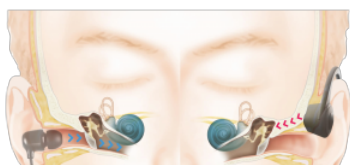

Recent reports of WHO state that nearly 2.5 billion or 1 in 4 individuals will be living with some degree of hearing loss by the year 2050. Even though with the help of the internet, practicing yoga at home and home workout sessions are becoming a common trend, a healthy alternative to headphones to reduce the risk of hearing loss still remains unknown to so many. But as they say, where there is a will, there is a way. In the fifth generation of the technological era, when all fails, it's the innovation in technology that offers the most credible and long-lasting solutions.

WeHear Innovations Pvt Ltd. is a start-up based in Ahmedabad, Gujarat, and in just three years of its inception and arrival in the market, it has launched several state-of-the-art ear health-friendly audio devices. One of these ultra-modern devices is the [WeHear OX](#) headphones. WeHear OX is a unique audio device that works on [Bone Conduction Technology](#) bypassing the physical ears and sending the sound directly to the cochlea. By virtue of the Bone Conduction Technology which has been used by the military for several years, the WeHear OX prevents the ears from any damage even after prolonged usage. Apart from being an [ear health-friendly](#) audio device, this device is a perfect one-in-all audio solution for professionals as it helps them in increasing their productivity by offering dual Bluetooth connectivity and a 72 languages translation feature, with the help of this feature language will no longer be a barrier in communication. For students learning online, the WeHear OX offers a perfect opportunity to learn multiple languages with the help of the [language translation feature](#) and avoid any damage to the ears. Moreover, due to its sturdy grip, ergonomic open ear design, this device is a perfect partner for fitness enthusiasts, cyclists, and athletes. It makes their workout routines absolutely safe and enjoyable by providing them with surrounding awareness and avoiding potential accidents.

WeHear OX is an audio device that is perfect for the ear health, safety, and well-being of all individuals no matter what their priorities or interests are.

The team at WeHear Innovations Pvt Ltd. is constantly dedicated to innovating not just ear health-friendly audio devices, but to building a lifestyle that keeps the ear health and safety of individuals intact and helps them in growing in all aspects of their life.

#HearSafeBeSafe with #WeHearOX.
