Who is Moataz Music and what is his style?

Agadir, Morocco Jan 24, 2022 (Issuewire.com**)** - Moroccan artist moataz music has a particular talent for conveying mixed emotions in his work. Take his music of crowd scenes, which can seem both harmonious and traditional.

This sense of pride is deliberate, moataz admits,

“I’m loving my traditions and I want to make something for it,” he says. “this feeling of pride when you

see your country upper .”

Perhaps this ability to stand apart and observe the dynamics and non-verbal interactions of groups is more acute moataz because he has lived as an outsider. This experience, he said, has given him the opportunity to contemplate and contrast his ‘Arabness’ with another culture.

“I like the openness of the way people think in Spain or the USA. They like to hear about other cultures and to share their traditions that's what gave me a big puch to make my music with an Arabic style,” he tells in an Arab News.

moataz music has a particular talent for conveying mixed emotions in his work.
As a child growing up in Morocco, he had displayed an early talent for making music and loving it, he used to like it but never tried to search more about it and to finish his studies in music, that's what made him choose after his graduation to make music in his free time and to share it with his family and friends, and many of them liked his work and noticed a unique way of how he presents himself in his music.
but the image began to be accomplished when he made a Moroccan version of an English song called " my heart will go one " for a regional competition of music, and he won it. after he noticed that music is where he found himself, so he made many kinds of music and produced his art for a lot of artists until he dropped his hit: "Yennayer", this music changed many things because of the particular style of the song which means the amazighi people's new year. after dropping it he recieved many positive reviews and chances to work with a lot of Moroccan artists, the thing that we are all excited about!

Moataz music showed to his haters that nothing is impossible, and that success can sometimes be late but if you deserve it, it will come as soon as possible.
