

Andrea Vanessa Harmon, RN, a Registered Nurse with NewYork-Presbyterian Hospital

Get to know Registered Nurse, Andrea Vanessa Harmon, who serves patients in New York, New York.

New York City, New York Feb 24, 2022 ([IssueWire.com](https://www.issuewire.com)) - Andrea is a registered nurse currently serving her patients at New York-Presbyterian Hospital, where she specializes in labor and delivery as well as obstetrics and gynecology.

New York-Presbyterian Hospital is a world-class academic medical center committed to excellence in patient care, research, education, and community service. Based in New York City, it is one of the nation's largest and most comprehensive hospitals and a leading provider of inpatient, ambulatory, and preventive care in all areas of medicine.

To begin her career, Andrea received her Master of Science in Nursing degree in Informatics and Nursing Education from the University of Phoenix in 2017. She earned her Doctor of Nursing Practice degree from Grand Canyon University in 2021.

Remaining up to date in her field, she is an active member of the Association of Women's Health, Obstetric and Neonatal Nurses, the American Nurses Association, the New York State Nurses Association, the Sigma Theta Tau International Honor Society of Nursing, and the American Association of Nurse Practitioners.

On a more personal note, Andrea attributes her success to loving what she does and being an advocate for her patients.

A Registered Nurse (RN) is a nurse who has graduated from a nursing program and met the requirements outlined by a country, state, province, or similar licensing body to obtain a nursing license. RNs fulfill a variety of job duties. In addition to their primary role in treating and caring for patients, their responsibilities also include educating patients and the public about a variety of medical conditions, as well as providing emotional support and advice to the families of their patients. Other RN job functions include leadership, research, performing diagnostic tests and analyzing results, operating medical equipment, administering medications, recording patients' symptoms and medical histories, and assisting with patient rehabilitation and follow-up.
