Dentistry, also known as Dental and Oral Medicine, is a branch of medicine that consists of the study, diagnosis, prevention, and treatment of diseases, disorders, and conditions of the oral cavity. Dentists diagnose and treat dental issues and help patients develop better oral hygiene regimens. They clean teeth, correct bite issues, perform surgeries and extractions, and perform other duties to ensure that the teeth and mouth are healthy.

When not performing family, cosmetic, and implant dentistry for her valued patients, Dr. Ferrari enjoys spending time with her two sons and her husband, Dr. Aldieri. She attributes her success to connecting with patients by explaining, especially when it comes to cosmetic options. What she thinks is best is not necessarily what the patient wants and she enjoys determining what the patient is looking to accomplish.
