About Boozcoin

The mission is to open up the wine and spirits market and allow anybody to buy the Booz they want from the supplier who has it at the best price with minimal exchange fees and additional costs and, be sure the bottle is genuine. This will benefit general consumers and support smaller regional growers/distillers who have restricted access to the international mass market. Please visit <https://boozcoin.com/about-boozcoin/>

About BoozExchange

The “BoozExchange” offers a base for BoozCoins to begin its growth. But it will not be the only place for BoozCoin. Since BoozCoin is a free decentralized market, with no single group or entity controlling the coin, the goal is that BoozCoin becomes an accepted method of payment for the wine and spirits market internationally and for food and beverage outlets.
