# Bwtech to exhibit as a featured partner at TelcoDR's CLOUD CITY, 22 February through 2 March

**Registration for TelcoDR CLOUD CITY is free, providing communication service providers (CSPs) with exclusive access to cloud-native software companies, product demos, and innovative content**

**Minas Gerais, Brazil Feb 15, 2022 (**Issuewire.com**)** - Bwtech, a leading provider of end-to-end performance monitoring and optimization solutions for the mobile communication industry, today announces it will be a featured exhibitor within TelcoDR CLOUD CITY. This year's CLOUD CITY showcase will be provided as a virtual experience and will bring together the innovators building the next generation of cloud solutions for the telco industry. CLOUD CITY will run from 22 February to 2 March and registration is open – and free.

Bwtech, which recently partnered with Google Cloud Platform, will showcase its latest cloud-native Service Assurance capabilities, with a special focus on AI/ML-based automation of network troubleshooting (NetWarden) and correlation of PM/CM/FM for 5G network assurance.

CLOUD CITY is an all-virtual showcase available on an interactive platform, which enables attendees to meet with cloud-native software partners; test drives the latest cutting-edge technologies; and watch a keynote speech by TelcoDR CEO and founder, Danielle Royston (DR). Finally, all the latest and breaking news from CLOUD CITY partners and cloud-first exhibitors will be available to registrants via the CLOUD CITY NEWS newsfeed.

"I'm excited to have Bwtech join us at CLOUD CITY," said DR, founder, and CEO, TelcoDR. "The CLOUD CITY virtual showcase allows telco executives to easily meet with all the up-and-coming enterprise software companies, like Bwtech that are pivoting their companies to build the latest cloud-

native solutions for the telecom industry. CLOUD CITY is a great way to visit one destination and see all the vendors making it happen, all in one place. It's a great way to immerse yourself in the new technology coming to the telco."

"We are thrilled to be partnering with TelcoDR and have the chance to show to a global audience our latest developments as a cloud-native solution for Service Assurance based on GCP", added Flavio Buratto, founder and CEO of Bwtech. "We will introduce MNOs and Managed Service Providers to our latest developments for 5G network assurance, AI/ML automation for faster network troubleshooting and how our solution can help to smoothly implement network swaps", concluded.

**About Bwtech**

Bwtech provides end-to-end performance optimization solutions for mobile operators, managed service providers, telecom regulators, and MVNE/Os. For the 4th consecutive year, the company was considered one of the best companies to work for by the Great Place to Work Institute.

Bwtech's flagship product, NetChart, is a web-based solution designed for end-to-end optimization and assurance of mobile networks, covering RAN, Backhaul, Core, IP, and VAS. NetChart modules include Configuration Management, Performance Monitoring, Fault Management, and Geolocation for 2G, 3G, 4G, 5G, and IoT technologies.

Many telecom providers rely on Bwtech solutions for mission-critical activities, such as real-time network monitoring, network quality reporting, NOC and SOC operations, capacity planning, and E2E network optimization. Follow Bwtech on LinkedIn. For more details, go to www.bwtech.com.

**About TelcoDR**

The telecom industry is on the precipice of a transformational shift – a monumental evolution driven by public cloud adoption – and TelcoDR is catalyzing this change, backed by our $1B Telco Transformation Fund. Founded and led by telecom's leading public cloud evangelist, Danielle Royston, TelcoDR is at the forefront of educating and inspiring communication services providers (CSPs) globally. Her team of public cloud gurus is in high demand, as telco execs seek strategic consultative support in key steps on their journey to the public cloud.

Additionally, TelcoDR has raised significant capital to take this evangelism even further, by acquiring telco software vendors and catapulting them to the public cloud through her Skyvera operating unit, as well as investing in startups like Totogi that are innovating and building truly public cloud-native technology. When TelcoDR's vision for the telecom industry has been achieved, CSPs will realize massive cost savings, drive tremendous business growth, and dramatically improve customer engagement.

Follow TelcoDR on LinkedIn and Twitter. To learn more, visit TelcoDR.com. For exhibition opportunities in CLOUD CITY, submit an exhibitor registration form for consideration.
