

Coinbase NFT platform launch date speculation creates creator frenzy due to size of the 73 million users on Coinbase

MBF-Lifestyle positioned with upcoming launch date; so as to to sell NFTs on the 73 million active digital wallet members using the Coinbase Platform.

Annapolis Valley, Nova Scotia Feb 13, 2022 ([Issuewire.com](https://www.issuewire.com)) - With Coinbase and its secure online platform for buying, selling, transferring, and storing digital currency; being just days away from opening its NFT Platform. So as to allow everyone to benefit from their creative spark; to contribute to a future where the “creator economy” isn’t a small subset of the “real” economy, but a central driver, something never done before. Part of MAT Mass Adoption Tokenization gives artists a just and fair livelihood.

With 73 million verified users, 10,000 institutions, and 185,000 ecosystem partners in over 100 countries who trust [Coinbase](#); to easily and securely invest, spend, save, earn, and use crypto.

It is why [Nova Scotia French Acadian visual artist Claude Edwin Theriault](#) of [MBF-Lifestyle east coast Design experience](#) is jockeying for NFT Creator Access with his Coinbase Account,

So as to enable the platform; to be his own personal Christies art broker platform to meet and greet the sub-niche Metaverse VR Real Estate Insignia Avatar interested crowd.

To showcase the collection that won Platinum level in Hermes Creative Design Award with [3D Motion Graphic experience design brand logos](#) that serve as the [Avatar/Insignia/ Coat of arms](#) that complement or even define where you are in the Critical Mass Avatar realm, of your Metaverse/Sandbox Virtual Real estate property. Just like a Nudie suit was the defining Talisman that said you were “IN” the country music industry. Now having an [MBFLifestyle](#) design in your Virtual Metaverse property has its own provenance clout in the visual narrative realm of what you want your Avatar/Insignia/Crest message to say that reflects something of worth and provenance value.

while Coinbase has 73 Million Digital wallet holders moving and trading crypto-like chips in a tech morph casino platform; all decentralized, autonomous, and uncensored, for trending visual artists being on coinable in 2022 is giving escape velocity to many an artist career. Something that mainstream brick and mortar galleries simply cannot. Due to it being an outdated Patrons/Artist platform hundreds of years old. The Opensea platform has 240;000 active users, [MBF-Lifestyle](#) has a few hundred NFT built on the gas-free minting platform, where 2.9% is taken of the sale price by the open sea once sold for a very fair broker fee, any artist would jump at compared to what mainstream art galleries pay.

To date, there is no word as to what the creator dashboard/fees % terms are; hence the jockeying to gain creator status on Coinbase 2022. And be Part of the massive disruptive technology revolution; of the multiple blockchain projects in the multiverse collection of metaverses that are built on it in a technological revolution that is evolving many times faster than the original web1.0 and web 2.0 phases.

The MAT Mass Adoption tokenization platforms are currently built waiting for artists to get the Irrefutable [proof of stake NFTs](#) to represent with the ease by which that public key wallet address makes it incontestable, it makes brokers' safety for sales secure and ledger encrypted forever. Since it gives them a digital time stamp to the second since blockchain record-keeping time is in seconds so owners can resell easily and profit.

Since the 3D Motion Graphics are ideal for projection and narrative as an inspired Digital Metaverse Artwork theme the FéCANE is currently in negotiation to add to the list of exhibitors for the Nocturne/Francofest in Fall of 2022 in Halifax Nova Scotia.
