

Doordeck is excited to announce a strategic partnership to enable Locale's clients to unlock doors using keyless entry

London, United Kingdom Feb 6, 2022 ([Issuewire.com](https://www.issuewire.com)) - Doordeck is excited to announce a strategic partnership to enable Locale's clients to unlock doors using NFC keyless entry.

Doordeck has partnered with Locale, the UK's provider of commercial real estate digital solutions. Doordeck's open SDK's and APIs allow for quick and easy integration with building management and tenant engagement apps. They are the only SaaS solution to enable [NFC keyless entry](#) for all commercial buildings, no matter the existing access control system installed. Doordeck provides the fastest, most reliable, and secure smart access control for commercial buildings.

Doordeck integrates with Locale to enable effortless [access control management](#) and secure door access. Locale's occupier access pass feature uses Doordeck's API to enable seamless digital access within a building, allowing for automated onboarding and the elimination of physical access passes.

Locale customers will benefit from enhanced security through military-grade encryption, role-based hierarchical security with multi-factor authentication. Alongside Doordeck's use of [NFC technology](#) and [cloud-based infrastructure](#) providing a fully secure package, Doordeck enables a seamless experience for Locale's clients, removing expenses when it comes to issuing new or replacement key cards and fobs.

The Locale app provides the key to [smarter building management](#). Locale aims to bring a building to life by forming a connection between building management and its customers, providing greater efficiencies

in property and facilities management. Locale provides bespoke guest management, member experience, communication, and connectivity for the buildings they manage.

Marwan Kathayer, Doordeck joint CEO & Co-Founder.

“Locale and Doordeck’s strategic partnership allows buildings to operate efficiently through technology helping to drive app engagement, provide insight and identify trends. Doordeck’s SDK integration within the Locale app, used across their impressive portfolio, enhances the overall building experience for tenants and building managers. We are excited that Doordeck can now be used in some of the most iconic buildings in the world.”

Daniel Gorman, Locale Chief Product Officer

“Having worked closely with the team at Doordeck we are proud to be launching our seamless digital access pass integration on Apple and Android. Led by the needs of occupiers, we aren’t resting on our laurels and are constantly looking to evolve our offering; strategic partnerships such as this one prove that the tech players are not just innovating and growing, they are proud to collaborate for the benefit of end-users. Doordeck’s SDK enabled quick and easy integration with our app and captures real-time rich data.”
