**Longview, Washington Feb 14, 2022 ([Issuewire.com](http://Issuewire.com))** - Dr. Sam Wise, DDS, MOM, MSc, MDS

Dental implants are lasting, stable tooth replacements that can be used to replace one missing tooth, several missing teeth, or complete arches of teeth. The dental implant post, which is a screw made of titanium, is surgically placed in the jawbone at the site of the missing tooth. It replaces the missing tooth root and ensures that your dental restoration is stable. A period of healing is then often required to allow the bone to begin to bond with the biocompatible post.

Following this healing period, our dentist will place the dental implant restoration, or replacement tooth, which fits on top of the implant post. Depending on which teeth are missing and your personal dental needs, your implant restoration might be a dental crown, dental bridge, or a complete or partial denture. Each dental implant restoration is custom-made to fit your smile comfortably and aesthetically.

Replacing a missing tooth can restore your smile to optimal health, function, and appearance. A dental implant is a great option for restoring your smile because the implant is designed to look, function, and feel just like your natural teeth, and with proper care, it can last a lifetime. For more information about the benefits of implant dentistry and to schedule your implant consultation, please call or visit us soon.

Dr. Sam Wise has three master's degrees; the American Board of Oral facial pain in 2018 and the Germany board of dental Implant in 2009, has two patents in dentistry, and has over 20 years of experience in Germany, the Middle East, and the USA.

Dr. Wise is an award-winning dentist with extensive education and experience. His priority is to provide each of his patients with a healthy and beautiful smile. He has master's degrees in oral biology, implantation and dental surgery, and oral medicine and implantation along with a Doctor of Dental

Surgery degree (DDS) and a two-year clinical residency at Rutgers School of Dental Medicine.

Dr. Wise chose the profession of dentistry because it combines art, science, and medicine. He shares that “the joy of life is to be free, and you can only be creative if you are free.” Dentistry allows him to be both. He loves his field because he understands that once you improve a patient’s smile, you improve their confidence and change their life for the better. There is nothing more rewarding to Dr. Wise!

Known for his kind manner and gentle touch, patients are comfortable trusting Dr. Wise with their care. His expertise extends to a wide variety of procedures and specialties, including:

Dental implants (over 5,000 placements)

All types of Specialize Neuropathology from the USA and got other two degrees from Germany in oral surgery and dental implants

Cosmetic dentistry, including complete smile makeovers

Prosthetics, including full-mouth rehabilitation

Endodontics (root canal treatment)

Periodontics

Orthodontics

TMD and orofacial pain

When he is not working, Dr. Wise enjoys spending his time with his wife and four sons. He enjoys reading, playing ping pong, chess and swimming.
