

Earthshot Nominated Shudhvayu | Democratic Solution of Air Pollution

Bloomberg Philanthropies, IKEA Foundation, The Ela Foundation now give approval and considered that Shudhvayu is a potential that can help us to make our air clean. It's a democratic way of solution and hope for the air pollution.

Delhi, India Feb 1, 2022 ([Issuewire.com](https://www.issuewire.com)) - I have a wonderful solution for air pollution that is Shudhvayu. It's a product which is invented by Mr. Amit Bhatnagar. **Shudhvayu** is a device that we can adjust over the car roof and you can easily install and uninstall this with is 60 seconds.

As we know air pollution is a poison which we take inside our body every day. We can't see this position but didn't have any option.

But now the solution is invented that is **Shudhvayu** which is one of the best air pollution removal devices through which we can clean our city's air. Now government also gives approval and recognized this device because they analyze how important it is. So, we have to take action to control pollution before it will take our life.
