

Eminence Technology- an IT company

We provide the best digital solutions

Mohali, Punjab Feb 23, 2022 ([Issuewire.com](https://www.issuewire.com)) - Eminence Technology is a trusted company established in 2008 that provides the finest digital solutions. We offer a wide range of services like web design, web development, mobile app development, IT consultancy. We deal with clients from more than 30 countries and have successfully completed 1400 projects so far.

We customise IT solutions for clients that can generate superior results and boost their business. We make sure that the complex and innovative ideas of our clients are broken down into smaller steps, following the Agile methodology, and bringing their vision into a reality. We try to understand the core needs of our clients and then customise their dream websites for them. The services provided by us include developing enterprise software, developing web applications, developing applications for mobiles, graphic designing, E-commerce development, SEO and digital marketing, etc. with changing requirements of the market we are making headways into multiple domains like AI, Blockchain, Cloud Computing, and such other areas.

We have got quite impressive reviews and ratings on many top-rated trustworthy websites including good firms, clutch, top firms, Upwork, Glassdoor, google Partners and many more. These are proof of satisfaction our clients have from the web solutions provided to them. Our organisation is rated as a top-rated plus company on Upwork and has completed 185415+ hours working on several projects. We have developed a number of projects related to travelling and healthcare solutions and tend to lead this domain with our quality code and intelligent problem-solving strategies.

Our company has developed websites for various renowned international companies like Hawaiian, biccllc, ITSCNC, Kit superstore, immersion hospitality, net.design, vacation rental agent, visionary solutions inc, perfect lift, pansy day, geeky girls journal, and many more. Client satisfaction is our utmost priority. We tend to provide the best we can and bring the dream website or application of our customers into reality. We value our customer's time and money. We work hard to strengthen the trust of our clients in us.

To accomplish our project we try to work systematically and in a proper workflow. Our team including business managers and programmers works unitedly and efficiently for bringing the best output. Our team works in a proper flow for the accomplishment of our client projects that starts from defining secondly developing and finally deployment the project, At the initial stage i.e. Defining we tend to have a meeting with the client where we try to get a hold of the root problem for which he needs a solution. The conversation is quite detailed so that both the developer can get a clear image of what is to be done and the client can have a rough idea of the expenses of the project. Then comes the Development stage where the work actually comes into action after proper planning of things is done and milestones are set . Regular interaction with clients is held to avoid any kind of mistakes and to make sure that the things designed are exactly what the customer needs. The desired changes are effectively made. After this finally comes the deployment stage, The testing of the project is done by our quality analysts to make sure that we serve the best to our customers. The final project is then delivered to the customer along with the promise that we shall entertain their every query related to their project in the future. We try our best to surpass the expectations of our clients. we bring you the experience that would be beneficial for you in the long run of the project and you can blindly trust us upon that.

We are not fixed to a particular domain but we are the leaders in Travel website domains, Healthcare domains, Real estate, Education, Fitness industry, POS making custom CRM development, etc. When it comes to the tools and platforms we use for the different services we have expertise in Magento, WordPress, Shopify, Laravel, PHP, .Net, React, Angular, etc. For designing, we have experts in Logo Designing, UI/UX Design, Mobile App Design, Responsive Design, E-Commerce design, mockup, brochure, whitepaper design, and use technologies like HTML/CSS, Bootstrap, Photoshop, Illustrator, Sketch, and much more. In mobile app development, we work on iOS, Android, Windows, Hybrid, Cross-Platform and Native. We also deal with Search Engine Optimization, PPC Management, Social Media Marketing, Reputation Management, Content Marketing, and Email Marketing. We promise you that your business website will be up there on the top in the Google SERP, bringing a lot of viewers to your website.

We provide some free services to our potential customers. We do have an option named “Free website audit” If you own a website, you can avail of this service. In it, we do a SWOT analysis of your website and see for faults and omissions in your site. We shall let you know about these errors. We shall work along with you if you want these issues to be mended and increase the reach of your website. Another facility we provide you is a detailed price brochure. If you are planning to work with us but are not sure if your pocket will allow for it or not, have a look at these packages. Go through these packages and see which one is suitable for you.

If you do have an idea in your mind or you want any kind of web solution for your business, Give us a chance to serve you. We shall try to meet your expectations.
