Excellence Recognized: SharkStriker Wins Cybersecurity Excellence Awards in 9 Categories

SharkStriker receives 9 Cybersecurity Excellence Awards 2022 in Fastest Growing Cybersecurity Company, Managed Detection and Response, SIEM-as-a-Service, and many more categories.

Walnut Creek, California Feb 24, 2022 (Issuewire.com) - **On February 24, 2022,** the Cybersecurity Excellence Awards named SharkStriker the winner in multiple categories: 3 for the company and 6 for product/service. The most significant ones are the Fastest Growing Cybersecurity Company, Managed Detection and Response (MDR), and SIEM-as-a-Service.

SharkStriker Inc. is a USA-based cybersecurity firm with global SOCs. The company's out-of-the-box Managed Detection and Response and SIEM-as-a-Service cover the comprehensive MITRE ATT&CK threat cycle to deliver optimal security with unlimited hands-on keyboard based incident response. Due to these unique services and expertise, the company is growing immensely. The innovator in the cybersecurity field has bagged hundreds of customers since it started. SharkStriker aims to continue this penetration and enhance the global security structure.

The Cybersecurity Excellence Awards is an annual competition. It recognizes and honors individuals and companies who demonstrate excellence in cybersecurity. The winners are primarily selected based on the demonstrated excellence and its impact on the industry. SharkStriker was chosen as the winner for eight categories based on the demonstrated leadership through the nominations and the popular votings received from the industry experts.

"The Cybersecurity Excellence Awards truly represent the global security community backed by industry experts. It is an immense pleasure for us to be recognized as the winners of the 2022 Cybersecurity Excellence Awards in multiple categories," said **Kunal Popat, Co-founder of SharkStriker**. "The shift

towards the cloud and remote workforce adoption has made cybersecurity even more challenging. SharkStriker aims to simplify cybersecurity with its machine-accelerated Managed Detection and Response (MDR) platform with built-in SIEM-as-a-Service capabilities. These awards are the testaments for our products and capabilities to meet global cybersecurity needs."

"We congratulate SharkStriker for the recognition as an award winner in multiple categories of the 2022 Cybersecurity Excellence Awards," said **Holger Schulze, CEO of Cybersecurity Insiders** and founder of the 500,000-member Information Security Community group on LinkedIn, which organizes the 7th annual Cybersecurity Excellence Awards. "With over 900 entries in more than 250 award categories, the 2022 Cybersecurity Excellence Awards program is highly competitive. SharkStriker demonstrated excellence in the company's growth as the best cybersecurity service provider and reflected the very best in innovation in tackling today's urgent cybersecurity challenges."

SharkStriker's Managed Detection and Response (MDR) service; is based on ORCA (Observe, Response, Compliance, Awareness) philosophy. It is a machine-accelerated platform that uses modern-day technologies like Machine Learning and Artificial Intelligence for real-time threat hunting without taking away the human factor. SharkStriker's cybersecurity experts use the platform to deliver hands-on keyboard-based threat hunting and incident responses. MDR service doesn't limit the number of Incident Responses (IR). Hence, the customers don't have to worry about retainers or hourly-based IR charges. SharkStriker's MDR platform is based on open architecture, meaning it can easily integrate with any existing cybersecurity solution, eliminating the need for any additional investments.

SharkStriker's SIEM-as-a-Service is a next-gen, machine-accelerated, and human-led platform; fully managed by cybersecurity experts. Service doesn't just leave customers with a SIEM infrastructure; SharkStriker's experts also conduct thorough research to help create on-time correlation rules. The SIEM platform is built with an open architecture, meaning it can easily integrate with existing security tools like SOAR to enhance visibility and reduce false positives and alert fatigue. What makes this SIEM-as-a-Service different and appropriate for customers is the billing approach. Most SIEM in the industry is priced based on Events Per Second (EPS) or data volume. Hence, several customers either try to reduce the number of events to monitor or ignore some data to bring down the volume and reduce the charges. SharkStriker charges are not fluctuated based on EPS or data volume, which enables the customers to monitor anything and everything for best-in-class security.

About SharkStriker: SharkStriker is a USA-based cybersecurity services providing firm with global SOCs. The company follows its ORCA (Observe, Response, Compliance, Awareness) philosophy to provide all-encompassing cybersecurity services. The ORCA philosophy is taken from the real-life world. Sharks only fear the killer whale or ORCA. SharkStriker's unique platform acts as the ORCA to strike all the sharks in the cybersecurity ocean. It goes beyond the traditional detection and response approach to cover the entire threat life cycle based on the MITRE ATT&CK framework. With its unique, white-labeled MDR platform, the company provides 24/7 monitoring. Moreover, its advanced SIEM capabilities allow storing log and event data for around a year, which is required for various primary compliances like ISO 27001, SOC 2 Type 2, GDPR, PCI DSS, NESA, SAMA, etc.
